STATISTICAL ABSTRACT, INDIA, 1950.

New Series. No. 2.

सत्यमेव जयते

P 6087
22 11.52

Issued by

CENTRAL STATISTICAL ORGANISATION
CABINET SECRETARIAT.

GOVERNMENT OF INDIA

PUBLISHED BY THE MANAGER OF PUBLICATIONS, DELHI.
PRINTED BY THE GOVERNMENT OF INDIA PRESS, CALCUTTA, INDIA,
1952.

PREFACE

With the transference of responsibility for statistical co-ordination from the late Ministry of Commerce to the Cabinet Secretariat the work relating to compendious statistical publications became the responsibility of the Central Statistical Organisation. The present issue of the Annual Statistical Abstract is the first to be brought out by the Central Statistical Organisation.

2. The Abstract seeks to present a representative selection of important heads of national statistics classified both by regions and by categories. The primary sources are indicated at the foot of each tabular statement.

3. The special features of the 1950 Abstract, which distinguish it from previous issues, are briefly indicated below :—

(*a*) A number of new tables have been introduced for the first time, as indicated in the table of contents. A list will be found in the appendix showing the tables added or deleted in this issue as compared with those in the previous issue :

(*b*) The manner of presentation of some of the tables, particularly those relating to Educational Statistics has been considerably modified with the assistance of the Ministry of Education ;

(*c*) Explanatory notes have been added to each section of the volume describing the scope and coverage of the series presented. In particular attempts have been made to collect data from all the constituent units in the Indian Union, *viz.* : A, B, C, and D States.

(*d*) Where there has been any change in the method of computation or in the area covered in a given series from any year onwards, a line has been drawn to indicate that the series after the line is not comparable with that before it. Wherever necessary a footnote has been added indicating the nature of the difference ;

(*e*) In order to effect economy in paper, the format has been abridged smaller types used in printing and the Abstract is issued as a single volume.

4. Acknowledgement is due to the various Ministries of the Government of India and the State Governments for their continued cooperation, and for the suggestions made from time to time.

ISSUED BY

THE CENTRAL STATISTICAL ORGANISATION,

CABINET SECRETARIAT,

New Delhi, 3rd June 1952.

The following symbols have been used throughout the Abstract :

.. = Not available,

—— = Negligible or nil,

Some of the units of measurements used are explained below :

One lakh = 100,000

One crore = 10,000,000

One maund = 82 2/7 lbs.

One ton = 2,240 lbs.

250	Petrol—Central Government's Revenue from Motor Spirit .	864
251	Salt—Statement showing Manufactures, Issue, and Average Selling Price of Salt	865
252	Liquor, Opium, and Others—Number of Shops licensed for the sale of Liquors, Opium, and Other Intoxicating Drugs; Receipts from licence fee, duty, and other items of Excise Revenue; and Incidence of Excise Taxation per head of Population .	866
253	Opium—Number of Chests of Provision Opium sold for Export and Issues of Medical and Excise Opium (for Export and Local Consumption)	870
254	Opium—Issue and Production—Area of Cultivation, Total Production, and Production per *bigha* of Benares Opium . .	872
	APPENDIX.	
A	Rates of Excise Duty on Liquors, Opium and other Drugs in each State as on 1st April 1950	873
B	Currency	882
C	Rates of Income-Tax and Super-Tax as on 1st April 1950 .	883
*D	National Income	888
*E	Electoral Statistics	891
	(i) Number of Voters and constituencies in each State	892
	(ii) Representation in Legislative Assemblies and the House of Parliament	893
	(iii) Representation in Legislative Councils together with Constituencies for the purpose	893
	Index	895

CLIMATE.

Meteorological data are recorded at over 250 observatories distributed all over the country and maintained by the India Meteorological Department of the Ministry of Communications. Besides these, there are over 2,500 rain recording stations maintained by the respective State Governments.

The present system of territorial divisions has been in vogue for a long time except for changes necessitated by mergers and the formation of new States. The meteorological divisions shown correspond more or less to the chief political divisions. All figures upto 1946 relate to undivided India; thereafter they are representative of the present territory of the Indian Union.

Rainfall.—Actual rainfall is recorded at 8-30 hours I. S. T. each day throughout the country. It is tabulated at the offices of the State officers controlling registration of rainfall and published in the State Gazettes. They are subsequently consolidated and issued by the India Meteorological Department in the form of two publications each year *viz.*, "Daily Rainfall of India" and "Monthly Rainfall of India".

Normal rainfall is the average over a period of years. The normals in use at present are based on data collected upto 1940.

Table 1 gives the normal and actual rainfall for the various Meteorological Sub-divisions of the country for the years 1940 to 1949. Table 2 gives for these divisions monthly and annual rainfall during 1949 with percentage departure from normal.

Temperature.—Temperature readings are taken at most of the observatories twice a day at 8-30 hours and 17-30 hours I. S. T. For this purpose thermometers are put in the shade in what are called "Stevenson Screens".

Mean temperature is calculated as the average of the maximum and minimum temperatures.

Sunshine.—Sunshine is the condition at the earth's surface when the sun casts a well-defined shadow. It is recorded at the principal observatories in India, by standard Campbell-Stokes recorders.

Monthly and annual data are shown for 1949 and annual only for 1946 to 1948 in Table 5.

These data are published in great detail by the Meteorological Department in the "Monthly Weather Reports" and the "Annual Summary".

AREA AND POPULATION

Tables below give in an abstract form the available data concerning area and population of Indian Union as it is constituted to-day. The main source for these data is the decennial report published by the Census Commissioner.

As a result of Partition and constitutional changes in India the coverage in the case of certain tables has undergone material changes. The figures now presented in the tables correspond to the new political divisions of the country, composed as they are of Part 'A', 'B' and 'C' States and Part 'D' territories of the Indian Union.

Mid-year-population.—Table No. 6 contains Mid-year population estimated for the inter-censal years.

Area, houses and population.—This table compiled from the census report deals with the split-up of population and houses into urban and rural. The principle underlying this classification is that areas with a population of 5,000 or more have been regarded as "urban", while areas with a population of less than this number have been classed as "rural".

Variation of population in the States.—Variation of population during the past three decades has been shown in Table No. 8. Here the re-adjusted population for 1941 has been taken into consideration.

Population of Principal Towns.—In this table 1941 data are compared with data at the previous census.

Statistics of selected tribes.—Population of important tribes with their location is shown in this table.

No. 6.—Estimated Mid-Year Population. (1)

(In thousands.)

Year.	Total.	Registtousan areas (2)
1938	374,920	282,110
1939	379,981	285,900
1940	385,343	289,978
1941	389,857	293,219
1942	393,631	295,853
1943	396,618	297,680
1944	398,416	298,321
1945	400,900	299,621
1946	404,970	302,480
1947	338,730	242,610
1948	342,120	245,459
1949	..	256,331
1950	..	260,918

(1) Upto 1946, figures include those of Pakistan.
(2) Relate to units formerly known as Provinces. Marked increase from 1949 due to margers.

MOVEMENT OF POPULATION

Available statistics relating to the movement of population between India and other countries are given in these tables. Emigration to various countries,etc., is analysed in the first two tables; while in the other tables passengers by unberthed passenger-ships on long and short voyage have been shown.

Emigration.—" Emigrant " for the purpose of these statements means any person who emigrates or has emigrated or has been registered as such under the Indian Emigration Act, 1922. Emigrants who proceeded to different countries and were repatriated therefrom under some rule or convention or otherwise assisted to return have been shown separately. They exclude passengers on unberthed passenger-ships who returned on their own. Total figures according to sex and occupation are shown for a period of nine years from 1940 to 1948 and in addition further split-up giving the share of the various countries of destination is given for the latest year (1949), for which data is available. Figures from August 1947 relate to Indian Union; prior to that they are for undivided India.

Ports of embarkation with number of emigrants are shown separately.

The primary statistical data concerning this subject are compiled by the Protectors of Emigrants at ports. This information is consolidated by the Ministry of External Affairs in the form of the publication entitled " Annual Report on the working of the Indian Emigration Act 1922 ".

Passengers by unberthed passenger-ships.—These tables deal with the number of passengers carried in unberthed passenger-ships from ports in India on different kinds of voyages. An unberthed passenger-ship means a ship carrying more than 30 unberthed passengers. The term 'unberthed passenger' denotes a passenger of 12 years or more for whom no separate accommodation in any cabin, state room, or saloon is reserved; this term does not include a passenger in attendance on a berthed passenger-ship, nor a child of less than one year of age. A passenger between the ages of one and twelve years is counted as half towards the total number.

The voyages are classified as " long " and " short ". The distinction between the two is that when a ship is expected to be continuously out of port for more than 120 hours she is said to be on a long voyage; otherwise on a short voyage. Long voyage figures are classified according as the destination is in India or out of India and short voyage figures are sub-divided into three classes according as the destination is (1) within the same State, (2) beyond the State but in India and (3) out of India. Total figures for all the above categories are given from 1939-40 to 1949-50. Detailed figures are shown giving the number of passengers from each port of departure to each port of destination on long and short voyages. The Mercantile. Marine Department, Ministry of Transport collect these statistics from the agents of the Shipping Companies under the Indian Merchants Shipping Act XXI of 1923.

No. 11.—NUMBER OF SKILLED AND UNSKILLED EMIGRANTS AND THEIR DEPENDENTS WHO PROCEEDED TO THE VARIOUS COUNTRIES UNDER INDIAN EMIGRATION ACT.

PUBLIC HEALTH AND VITAL STATISTICS

Available information concerning vital statistics and Public Health in India are shown in an abstract form in the tables under this section. *Data* in greater detail are published by the Ministry of Health, Government of India, and the various State authorities in the form of periodic Reports. The information relates to the former Indian provinces or Part A and C States as they are known now. The latest year for which *data* are available is 1948 in most cases. While the figures for this year are shown in greater detail, corresponding figures for the earlier years are shown as totals only. Upto 1946 the figures relate to registration areas of undivided India and thereafter to that of Indian Union.

Birth Rates and Death Rates shown in Table No. 19 are the rates per thousand of mid-year population and the infant mortality rates are expressed as the number of such per thousand live births during the period. Registration areas are the former Indian Provinces where registration of births and deaths is compulsory.

The next Table, No. 20, shows the actual number of these births and deaths in registered areas, their distribution between male and female and the ratio between the two. The death rate is further classified into Urban and Rural according to the cause of death and according to the season and the months of the year.

Table No. 21 shows the State-wise distribution of death rates classified into Male and Female and into Rural and Urban while Table No. 22 shows the birth rate State-wise and the excess of births or deaths and *vice versa* per 1,000 of population.

The subsequent Table No. 23 deals with death rate per 1,000 of population shown State-wise according to cause of death. The more commonly known epidemics are separately shown while the other diseases are grouped together.

Comparative rates of deaths from various causes for different States may not necessarily represent the actual conditions. In some cases there are wide variations between different States in the figures of rates of deaths due to different causes but it is difficult to assign any reason for these variations. Hence, inter-State comparisons may not be strictly valid. However, they may be used for comparisons over a period of years for the same area.

The number of hospitals and dispensaries run by the Government and their State-wise distribution are shown in Table No. 24, together with the number of patients treated indoor and outdoor, and the number of beds available. Income and expenditure of these hospitals, the sources of income and classification of expenditure are also listed State-wise giving an overall picture of the total income and expenditure on account of State hospitals.

Similar *data* concerning Special, Railway, Private, Non-aided, and Subsidised hospitals are shown in the next table. The succeeding table lists the diseases, and the total number of patients treated and total number of deaths (indoor) of such patients in the hospitals and dispensaries in the whole of India. Table No. 27 shows the corresponding State-wise distribution of patients treated and number of deaths indoor under each disease for the year 1948, the latest year for which these *data* are available.

Number of cases of human poisoning and animal poisoning are shown separatlely in Table No. 28 together with the kinds of poisons used.

Data concerning mental hospitals are separately shown in Tables No. 29, 30 and 31. In Table No. 29 the number of patients admitted during the year, number discharged and number who died, etc., are given with State-wise distribution according to sex, religion, etc., the expenditure incurred by Government, receipts and net cost to Government on account of these hospitals. Table No. 30 shows the classification of the types of insanity among males and females. Further *data* concerning the causes of insanity are shown in Table No. 31. Number of cases due to each cause divided into male and female are shown State-wise for the year 1948. For the earlier years total figures for India are shown.

No. 19.—Birth Rates, Death Rates and Infant Mortality Rates.

Registration Areas (1)

Year.	Birth rates (Per thousand population).	Death rates (Per thousand population).	Infant mortality rates (Per thousand live births).
1938	33·3	23·7	167
1939	32·7	21·6	156

EDUCATION.

TABLE 32.—

General Summary.—As complete and reliable data are not available for the former Indian States, information in this and the subsequent tables is given only for the former Provinces, now known as A, C and D States (pre-partition Provinces up to 1945-46, thereafter Indian Union Provinces).

The summary table is meant to give a general idea of the educational development in the urban areas of the reporting states, during the decennium ending 1948-49. As the system of co-education has been generally accepted and is largely in vogue, the information regarding the number of institutions and scholars studying in them, has been shown under the title : Colleges and schools for men and women. However, to give an idea of the comparative growth of education among men and women, information regarding the total number of men and women scholars in all institutions is also given.

The terms "Men" and "Women" connote "Boys" and "Girls" wherever relevant.

Information about expenditure relates to recognised institutions only. By direct expenditure is meant expenditure on the salary of teachers, and other recurring expenditure, while indirect expenditure means all expenditure on inspection, direction, building, scholarships, etc.

TABLE 33.—

Number of Institutions by types.—In this table data on the various types of recognised institutions for men and women, are given for A, C and D States from 1939-40 to 1948-49. *Recognised* institutions are those educational institutions which are recognised by the Government and follow the prescribed courses of study. They are open to inspection and general direction by the Education Department of the Government. Totals are given for un-recognised institutions.

Figures relate to pre-partition Provinces up to 1945-46, and thereafter to Indian Union Provinces. Panth Piploda was included in 1947-48, while Bilaspur, Kutch and Himachal Pradesh came in 1948-49 only. State-wise distribution of the various types of institutions for men and women is shown for the latest year (1948-49) for which figures are available.

TABLE 34.—

Number of Recognised Educational Institutions by management ; Unrecognised Educational Institutions and number of scholars.—In this table total figures are given for the various A, C and D States (coverage from year to year being the same as in the case of Table 33) showing management-wise distribution of recognised educational institutions and scholars attending them. Information for aided and unaided institutions is given separately. Total figures are also given for unrecognised institutions.

Other useful information available in this table is the average daily attendance in various recognised institutions and the number of girls in boys' schools and *vice versa.*

TABLE 35.—

Number of Scholars in Institutions (by types).—This table gives the total number of scholars (both men and women) attending the various recog-

nised institutions by types, and all unrecognised institutions, in A and C States. State-wise distribution is given for 1948-49 and totals (for all the states covered) are shown from 1939-40 to 1948-49. The coverage and limitations of this table are the same as in the case of Table 33 (Number of Institutions).

TABLE 36.—

Number of Men and Women scholars in Institutions for General Education, by Stages of Instruction.—This table shows the number of men and women scholars attending those institutions in A and C States which do not impart any vocational or professional training and are meant for general education only.

Details according to the various courses of study are given for recognised Schools and Colleges and totals for un-recognised institutions. Totals are given for 1947-48 (excluding Bilaspur, Kutch and Himachal Pradesh) and State-wise details with their totals for 1948-49.

TABLE 37.—

Number of Men and Women Scholars in Institutions for Professional and Special Education.—In this table men and women scholars studying in recognised institutions for professional and special training in A and C States, are enumerated according to the various types of institutions, including adult schools. The presentation and coverage are as in the preceding Table.

TABLE 38.—

Expenditure on Education by Sources.—This table gives the distribution of total expenditure on *recognised* institutions by sources from which finances are drawn.

All other sources include income from endowments, subscriptions, contributions, etc.

State-wise details are given for 1948-49 and totals (under each source) for the last 9 years. The totals have the same coverage as in the case of the earlier tables (*e.g.*, Table No. 33).

TABLE 39.—

Sources of Expenditure on Education, by management.—This table gives the total expenditure from various sources of income, separately for institutions under public and private management.

A separate account is given for indirect expenditure (*i. e.*, on buildings, direction, inspection and so on) from the various sources.

The coverage and limitations of the figures shown from year to year are the same as those governing the preceding table.

TABLE 40.—

Expenditure by types of Institutions.—This table shows the total expenditure on recognised institutions in A and C States. Distribution by types of institutions is given in the case of direct expenditure while totals for all institutions for men and women are given for indirect expenditure.

Totals (with the same coverage as in earlier tables) for the last nine years are also given.

TABLE 41.—

Teachers in Recognised Schools for General Education.—This table shows the number of men and women teachers in recognised schools for general education, distributed according to the three stages of school education, *viz.*, primary, middle and high. Teachers are classified to show how many were trained and how many untrained. *Certified* teachers are those untrained teachers who have a Teacher's Certificate, other than the one granted on the basis of public examination conducted by a Teachers' Training College or School.

State-wise details are given for 1948-49 as also totals for 1947-48 (excluding Bilaspur, Kutch and Himachal Pradesh).

TABLE 42.—

Examination Results—1948-49.—This table gives the State-wise distribution of scholars who appeared or passed the various public examinations conducted by the various universities, recognised technical colleges or schools, Boards of Secondary and Intermediate and other Education constituted by law.

Side-headings have been omitted wherever not applicable, *e.g.*, Professional Colleges have been omitted in the case of Assam, Ajmer, Coorg, etc.

TABLE 43 —

No. of Institutions and scholars in Rural Areas.—This table shows the progress of education in rural areas, that is, areas outside the limits of municipal, cantonment, notified and small-town committees.

The various types of institutions for men and women have been enumerated along with the scholars (both men and women) attending them.

State-wise details are given for 1948-49 as also totals for the last nine years.

TABLE 44.—

Expenditure on Rural Education, by Sources.—Classification of expenditure on rural education (both direct and indirect) is given in this table by sources. State-wise details are given for 1948-49 and totals for the preceding nine years. As in earlier tables, figures from 1939-40 to 1945-46 relate to pre-partition Provinces and thereafter to A and C States of the Indian Union and they have the same limitations regarding coverage from year to year.

Printing Presses and Publications.

In this section an account is given of the number of printing presses in the country and of newspapers, periodicals and books published during each year beginning, 1939-40. The latest year for which these details are available is 1949-50.

State-wise distribution with All-India totals is given for the latest year while only totals are given for the earlier years. In the case of the earlier figures undivided Provinces alone were included upto 1945-46 and thereafter only the Indian Union Provinces upto 1948-49. Figures for the latest year are for the Indian Union as a whole.

JUDICIAL AND ADMINISTRATIVE

JUDICIAL AND ADMINISTRATIVE.

This section presents information relating to the administration of Civil and Criminal Justice, Registration, Police and Prisons. The data have been compiled from the returns furnished by the State authorities. Figures prior to 1947 are for undivided India, except in the case of Prisons statistics, where figures prior to 1946 relate to undivided India. Data for Police are available from 1946 and relates to Indian Union only. Information up to the year 1948 was being collected from the former Provinces alone. However, in the civil and criminal justice portions, the figures for 1948 are inclusive of Bhopal, Bilaspur and Tripura also. Those for Registration during 1948 also include Travancore-Cochin in addition to the above three states.

An attempt has been made for the first time to collect the data for 1949 on an all India basis and the response from part 'B' and 'C' States, not hitherto accounted for, has been quite encouraging. The *totals* for 1949 would therefore, not be strictly comparable with earlier data.

Figures relate to the Calendar year period except in the case of certain part 'B' and 'C' States, which could only give figures for the financial year 1949-50. In the interest of uniformity in figures, such states have been requested to have the requisite Administration Reports relate to the Calendar year period in future.

Offences reported.—Include offences reported during the year to the Police and through private complaints to the magistrates *plus* the number of offences pending from the previous year.

Returned as true.—An offence is reported to be true, when as a private complaint it is not dismissed under section 203 of the Criminal Procedure Code, or if based on a report to the Police under section 154 Criminal Procedure Code, it is not written off as false by a magisterial order.

Cases brought to trial.—All cases in which an accused person appeared personally or by agent before a Court are declared as "Cases brought to trial".

Cognizable Crime or case: means an offence or a case for or in which a Police officer, under any law for the time being in force, can make arrest without warrant.

Non-Cognizable Crime or case: means an offence or a case for or in which a Police officer may not arrest without warrant.

No. 46.—Number of Judicial Divisions, and number of Officers exercising Appellate or Original Jurisdiction in India.

NATIONAL FINANCE

NATIONAL FINANCE

The tables contained in this Section cover, in general, the transactions not only of the Central Government but also of the Provincial Governments with their separate resources and separate balances and represent mainly the actual cash receipts and disbursements during the financial year April to March as distinguished from amounts due to or by Government during the same period.

2. The Section begins with a general statement of the transactions and of the balances of the Central and Provincial Governments as also of Coorg from 1941-42 to 1949-50 which is followed by two tables showing, in somewhat greater detail for the year 1949-50, statements of the ordinary revenue and the expenditure on revenue account of the Central and State (Part 'A' State) Governments and of Coorg. Principal heads of revenue and the expenditure thereon have been dealt with exhaustively in Table Nos. 81 to 89. With the exception of Table Nos. 86 to 89 on Land Revenue, Provincial Excise Revenue, Stamp Revenue and Forest Revenue which contain figures for 1949-50, other tables in this group contain information from 1941-42 to 1949-50. Table Nos. 91 and 92 on Interest Receipts and Famine Relief also contain figures for the latest year.

3. The Accounts are divided into four main heads.—(1) Revenue (2) Capital (3) Debt and (4) Remittance. The first deals with the proceeds of taxation and other revenue receipts and the expenditure therefrom, the net result of which represents the revenue surplus or deficit for the year. The second deals with expenditure met usually from borrowed funds, incurred with the object either of increasing concrete assets of a material character or of reducing recurring liabilities. The third comprises receipts and payments in respect of which Government becomes liable to repay the money received or has claim to recover the amounts paid, proper adjustments being made respectively for repayments of the former and recoveries of the latter. The fourth and last division includes all adjusting heads.

No. 78.— General Statement of the Transactions and of the Balances of the Central and Provincial Governments.

INCOME TAX : CLASSIFICATION OF DEMAND.

Table Nos. 93 to 95 contain information regarding Income Tax and Super Tax demands made under the Indian Income Tax Act of 1922 for the years 1941-42 to 1949-50. Figures prior to 15th August 1947 relate to Undivided India.

Though the scope of the above Act has been enlarged by Section 3 of the Indian Finance Act, 1950 (25 of 1950) and it now extends to the whole of India, except the State of Jammu and Kashmir, the figures collected so far for purpose of these tables are for the period prior to the coming into operations of this amended Act.

In these tables, All-India and Provincial figures contain information regarding the total number of assessees, total income assessed and the total tax demanded under the different classes of assessees, *viz.*, (i) Individuals, (ii) Hindu undivided families, (iii) Unregistered firms and other Associations of persons and (iv) Companies and other concerns assessable at company rate. In addition, the All India figures for the latest year are also classified according to the grade of total income.

The classification according to grades is based on total income assessed which is net figure after allowing for deduction of Excess Profits Tax, Business Profits Tax and Earned Income Allowance. They do not also include income from Capital gains.

No. 93.—Classification of the Income-tax Demand for the year ended 31st March 1950 according to the grade of total income and class of assessees.

LOCAL BODIES

LOCAL BODIES

This section deals with statistics relating to the constitution and administration of local bodies, *viz.* Municipalities and District and Local Boards as constituted in the different States of India as also the three Port Trusts in Bombay, Calcutta and Madras.

In these tables, figures for previous years upto 1946-47 relate to undivided India and those for 1947-48 for Indian Provinces as they stood just after partition. While information for Parts A, B & C States has, as far as available, been incorporated in the figures for 1948-49.

Table No. 96 deals with population and constitution of Municipalities and their income and expenditure, *i.e.* it contains, under broad heads, information regarding number of Municipalities, total population within Municipal limits, number of members both official and non-official—total income, incidence of taxation per head of population and total expenditure. Income and expenditure for the latest year of those Municipalities from which returns have been received, have further been analysed, in greater detail in Tables Nos. 97 & 98. Table No. 99 contains names of all Municipalities with population of 50,000 and above together with their income and expenditure.

Information regarding the number of District and Local Boards in each State together with the number of members—official and non-official—and income and expenditure of these Boards, is contained in Table No. 100.

Statistics of Port Trusts under the following broad heads—number and classification of members, income, expenditure and capital debt have been given in Table No. 101.

No. 96.—Population and Constitution of Municipalities, with Income and Expenditure.

(a) Revised.
(b) Includes Rs. 14,00,000 and Rs. 8,00,000 towards contribution to Capital Account and the Revenue Reserve fund Account respectively.
Note.—Figures Prior to 1946-47 relate to undivided India.

EXCHANGE, COINAGE AND CURRENCY.

This section presents a statistical study of matters connected with Exchange, Bullion, Government Securities, Coinage and Currency.

TABLE 102.

Money Rates in India.—This table contains the highest and lowest of money rates ruling during the year (April to March) from 1939-40 to 1950-51.

Bank Rate.—The standard rate at which the Reserve Bank of India is prepared to buy or rediscount bills of exchange or other commercial paper eligible for purchase under the Reserve Bank of India Act.

Imperial Bank of India Hundi Rate.—The rate at which the Imperial Bank discounts first class three months commercial bills.

Call Money Rate.—Relates to inter-bank advances repayable at very short notice.

Bazar Bill Rate.—Rates at which bills of small traders are reported to have been discounted by shroffs. These are unofficial quotations.

Treasury Bill Rate.—Represents the average rate of discount on Central Government treasury bills sold to public during the period.

Deposit Rates.—As quoted by larger banks in Bombay.

TABLE 103.

Foreign Exchange Rates.—Figures represent the selling rates of T. Ts. in Bombay and are the averages of working days during the period.

The last two columns show the London/New York cross rates. The new cross rate of 2·79⅞ selling and 2·80⅛ buying was established on 19th September 1949, following the devaluation.

TABLE 104.

Prices of Indian Government Stock.—Quotations represent the discount or premium over the face value of the principal Government of India securities. They are furnished by the brokers and are the average of daily selling prices during December each year at Calcutta Stock Exchange.

TABLES 105 & 106.

Prices of Gold and Silver.—Price quotations show the highest, lowest and average prices of Silver in London, New York and Bombay and of Gold and Sovereigns in Bombay. Average prices are the averages of closing quatations for working days. Price of Silver in London was quoted per standard ounce till December 1944 and thereafter per fine ounce.

Stock figures are the averages of week-end stocks.

TABLE 107.

Sterling Transactions.—Figures represent purchase and sale of Sterling by the Reserve Bank of India and exclude Government transactions. *Purchases* include ready and forward purchases and cancellation of forward sale contracts while *Sales* include ready and forward sales and cancellation of forward purchase contracts. Figures upto 1943-44 are on the basis of only actual deliveries of sterling.

Data upto 1947-48 relate to undivided India, while those for 1948-49 and onwards are for the Indian Union only.

TABLE 108.

Government Promissory Notes enfaced for payment of Interest in London. — Enfacement is an endorsement made length-wise across the face of a promissory note to the effect that the interest is payable at the place named in the endorsement. Holders of Government securities desirous of transferring them from India to London for payment of interest have to apply to any of the Public Debt Offices in India, tendering at the same time their Government Promissory Notes duly receipted for the purpose. The Public Debt Office then issues to the holders non-transferable London certificates under advice to London Office. The holder have to present these certificates to the Reserve Bank of India, London, in exchange for Government Promissory Notes, interest on which will be payable in London. The same procedure is followed when holders of Government Promissory Notes in London desire to draw interest in India.

The mean prices of the 3½ per cent. enfaced Rupee paper are the averages of daily closing quotations. From 27th August to 3rd October 1946, the quotations continued to be nominal, when the loan was paid off.

TABLE 109.

Silver Redemption Reserve.—The primary object of the Silver Redemption Reserve is to provide sterling assets for transfer to the Issue Department of the Reserve Bank of India against delivery by the bank of rupee coins in accordance with the *proviso* to section 36(1) of the Reserve Bank of India Act. The Reserve was created with a balance of £7·5 million (Rs. 10 Crores) worth of Sterling Securities and the intention is to maintain it at a market value of Rs. 10 Crores. The amount accruing to the reserve is thus transferred to Revenue.

TABLE 110.

Purchase and Sale of Silver.—This head replaces the head " Gain or Loss on Revaluation, Sale, Transfer, etc., of Assets of Paper Currency Reserve—loss on sale of Silver ", which was formerly used as a suspense head to accommodate the book losses arising out of Sales of Currency Reserve Silver, since 1927-28. The loss on Sale of Silver since the commencement of selling operations and unadjusted balances under the suspense head " Sales of Silver " amounted to nearly Rs. 44·61 crores at the end of 1934-35 and this figure was taken as an opening balance of the head " Purchases and Sales of Silver " on 1st April 1935.

TABLE 111.

Number and Value of Money Coined.—Figures are shown separately for Bombay and Calcutta mints. Lahore mint was established in 1943-44 and went over to Pakistan subsequent to 1945-46 as a result of partition. Figures for Lahore mint have, therefore, been shown for this period only and have also been accounted for in the totals accordingly.

Indian mints have also minted coins for foreign countries like East Africa, Ceylon, Malaya, Strait Settlements, Iraq and Egypt. The number and value of such coins, together with those minted for Indian States have been shown separately within brackets below the figures of Indian money.

Classification has been made according to the metal of coins. The denominations of Indian coins included under each metal are explained below :—

Silver.—Includes quaternary rupees, half rupees and quarter rupees. The issue of quaternary (silver) rupee coins was discontinued from end of May 1946.

Nickel.—Only one-eighth rupees and one anna pieces were struck in nickel till 1946-47, when nickel half rupees and quarter rupees were also introduced. Nickel rupees were first struck during 1947-48. Nickel half anna was also introduced simultaneously.

Nickel Brass and Cupro Nickel.—Include one eighth rupees, one anna and half anna pieces.

Bronze.—Includes single pice, half pice and pies. 'Half Pice' and 'Pie' pieces were not struck from 1942-43 onwards.

TABLE 112.

Value of Old Silver Coins received for recoinage and New Silver Coinage.—Value of new silver coinage exclude the foreign coinage. Lahore mint is included from 1943-44 to 1945-46.

TABLES 113 & 114.

Import and Export of Gold and Silver.—Figures represent the exports and imports of bullion and coins on private and Government accounts. Upto and including 1941-42 figures relate to India and Burma. Figures upto the end of February 1948 are for undivided India, but those relating to the ports of Karachi and Chittagong have been excluded from 1st and 15th August 1947 respectively. Since March 1948 the data are on a post-partition basis *i.e.* include the sea-borne trade of the Indian Union with Pakistan. Foreign sea-borne trade of Kutch has been included from 1st June 1948 and of Travancore, Saurashtra and Baroda from 1st April 1949.

Table 150.—The figures for the years 1943-44 to 1945-46 do not include the Sales of about 7·5 million ounces of Gold made in India on behalf of the Allied Governments.

Table 151.—Government of India rupees are shown at face value.

TABLE 115.

Value of Gold and Silver received and coined in Mints.—Data relate to Bombay and Calcutta mints only. Old rupees received for recoinage are taken at their nominal value. Silver received into mints for foreign and Indian States coins is not included.

TABLE 116.

Issues of India Notes by Denominations.—Data exclude the Government of India one rupee notes (introduced in July 1940), which are treated for the purposes of the Reserve Bank of India Act as rupee coin. Rs. 10,000 notes, mainly used by banks for making large adjusting payments, are also excluded. Notes of the denomination of Rs. 500, Rs. 1,000 and Rs. 10,000 were demonetised from 12th January 1946.

Figures upto 1941 are inclusive of Burma Notes. Upto and including 1947 figures relate to undivided India, while those for later years are net of adjustments made on account of India Notes returned from circulation in Pakistan.

TABLE 117.

Statistics of Note Circulation.—Figures are for the last Fridays of the year ending March. These are inclusive of Burma Notes till the year 1941-42. Figures upto 1947-48 relate to undivided India; those from 1948-49 are net of adjustments made on account of (i) transfer of liabilities to the State Bank of Pakistan in respect of inscribed Pakistan Notes issued between April and June 1948 and (ii) cancellations of India Notes returned from circulation in Pakistan under Section 4 (2) of Part IV of the Pakistan (Monetary and Reserve Bank) Order, 1947, as amended.

Rupee Coin.—Includes Government of India one rupee notes from 1940-41 onwards.

TABLE 118.

Absorption of Currency.—Including Burma notes upto 1942-43. Figures for 1948-49 and onwards relate to the Indian Union; earlier figures are for undivided India.

Rupees.—Include quaternary and nickel rupees. Goverment of India one rupee notes are also included since July 1940.

TABLE 119.

Absorption of Small Coin.—Inclusive of figures for Burma upto January 1942. Figures from 1948-49 relate to the Indian Union; earlier figures relate to undivided India

TABLE 120.

Receipts, Charges and Net Profits of Currency Department.—This table presents an annual Balance Sheet of Currency Department.

The item "Share of the Surplus profits of the Reserve Bank" is intended for an adjustment of surplus profits payable by the Reserve Bank under Section 47 of the Reserve Bank of India Act. Share of the Bank's profits payable to the Government of Burma under the India and Burma (Monetary Arrangement) Order 1937 is taken in reduction of profits under this head. No adjustment on the account has, however, been made with the Government of Burma since 1942-43.

Other Receipts.—Include (i) receipt from currency notes press, (ii) value of old currency notes assumed to be no longer in circulation, (iii) value of unclaimed currency notes, (iv) receipts in England, (v) loss or gain by exchange and (vi) miscellaneous receipts.

PRICES CURRENT

Statistics of *wholesale prices* are based mainly on reports received from commercial bodies in the important market centres. Information is available concerning almost all the principal commodities that enter into the trade of the country.

Index Number of Wholesale Prices in India.—It is a general purpose index with Sept. 1938–Aug. 39 as base. It covers 78 commodities divided into 5 major groups and 18 sub-groups. The major groups comprise food articles 11, industrial raw materials 19, semi-manufactured articles 23 manufactured articles 19, and miscellaneous 6. The index is the geometric mean of price relatives with weights proportional to the value of quantities marketed during 1938-39. Quantities retained by producers have been left out of account in the case of agricultural commodities and other industrial raw materials. With regard to manufactured and semi-manufactured products it was assumed that the entire production was put on the market. Percentage weights are as follows :—food articles 31, industrial raw materials 18, semi-manufactured articles 17, manufactures 30, and miscellaneous 4. The index is calculated weekly from once-a-week prices on or about Friday for 230 varieties of the 78 items. Monthly indices are the averages of weekly figures. This index is compiled by the Economic Adviser to the Govt. of India.

The Monthly Index Number of Wholesale Prices in Calcutta.—The articles for which quotations are available are classified under 16 groups and a separate index is worked out for each group. The index for any group is the simple arithmetic average of the price relatives of the articles included in the group with July 1914 as base. A system of weighting is introduced within each group by the inclusion of more than one quotation for same articles within the group. The general index is simple average of all the individual price relatives included in the computations. This index series is issued by the Department of Commercial Intelligence and Statistics, Calcutta.

Wholesale Prices of Certain Staple Articles of Trade at Selected Stations in India.—Figures are given for several varieties in the case of most of these commodities but they generally relate to the chief market only. The figures represent the wholesale prices prevailing in the markets during the last week of each month.

Working Class Cost of Living Index.—The figures for the various centres relate only to working class families, the heads of which are in full time regular employment. They represent temporary changes in cost of a given

schedule of goods and services consumed by workers in each centre. The items in the list of articles consumed by the working classes are grouped under five heads, *viz.* food, fuel and lighting, clothing, house-rent and miscellaneous and separate indices are worked out for the individual groups. The index for any group is the weighted arithmetic average of the price relatives of the several items of the group, the weights being proportionate to the expenditure of an average working class family on the item. To arrive at the general index, the group indices are averaged together after being weighted by the percentages of the total expenditure devoted to each of these groups by an average working class family. Rent figures in all cases are obtained from enquiries held at long intervals and figures continue unchanged from the time of the latest enquiry. No account is taken of the seasonality in prices of commodities and services included. Annual indices are the arithmetic means of the monthly indices.

Average Annual Retail Prices of Food Grains and Salt.—These figures are compiled from reports submitted to the State authorities by officials in Taluk centres on the basis of personal inquiries. Figures are given for important centres in each State. The food grains included are rice, wheat, jowar, bajra, ragi gram and barley. The prices given in the tables represent the annual average of the fortnightly figures.

Index Number of Security Prices.—The index number of security prices, which is compiled by the Reserve Bank of India, is a general purpose index with the year 1938 as base and replaces the series compiled by the office of the Economic Adviser to the Government of India, with 1927-28 as base. In the compilation of the index, 398 scrips are included. These scrips have been selected from among those quoted on the Bombay, Calcutta and Madras stock exchanges with due consideration to the importance of the concerns to which they relate and their activity in the market. The scrips have been classified into three groups and thirty one sub-groups and weights allocated to each of them, proportionate to the total amount of loans outstanding, in the case of *government and semi-government securities*, and to the total paid-up capital of all companies quoted on the exchange, in the case of *fixed-dividend industrials* and *variable-dividend industrials*. The index is calculated on the basis of weekly average prices for the selected scrips. The average quotations of the scrips during the base year represent the arithmetic means of the daily quotations for the whole year. Monthly and annual indices are averages of weekly figures.

BANKS

Explanatory Note

The tables in this section present a consolidated picture of important Liabilities and Assets of several Classes of Banks which have been classified as follows :—

(i) Reserve Bank of India.

(ii) Indian Banks comprising :—

(*a*) the Imperial Bank of India and other Indian scheduled banks known as Class A1 Banks.

(*b*) Indian non-scheduled banks, *i.e.*, banks not included in the second schedule to the Reserve Bank of India Act. These are subdivided into categories A2, B, C and D according to the amount of Paid-up Capital and Reserve.

(*c*) Indian Co-operative Banks registered under the respective laws of the States where they are situated. These are also subdivided into Class A and B according to Capital and Reserve.

(iii) Exchange Banks, whose registered offices are located outside the Indian Union and Pakistan.

Besides this, two tables showing (i) Percentage of Cash Balances to Liabilities on deposits of several Classes of Banks and (ii) Total number and amount of Cheques cleared, are also given.

TABLE 127—

Progress of Banking Capital in India :—

A : *Liabilities and Assets of Reserve Bank of India (Banking Department)*.—From the 15th August 1947 to 30th June 1948 the Reserve Bank of India functioned as the Central Bank for the Indian Union and Pakistan. The liabilities and assets relating to Pakistan for this period are given in brackets below the consolidated figure for the Indian Union and Pakistan for 1948. Subsequent figures relate to the Indian Union.

B : *Liabilities and Assets of Imperial Bank of India*.—Figures in this table relate to the business of the Bank both in the Indian Union and abroad.

C : *Liabilities and Assets of Exchange Banks*.—Data up to 1945 are as on the last Friday of each year and for subsequent years as on the date of the balance sheets. Figures up to 1945 are for undivided India including Burma up to 1941. From 1946 onwards figures relate to the Indian Union only.

D : *Liabilities and Assets of Indian Joint-Stock Banks*.—Figures up to 1945 relate to Joint Stock Banks registered in Undivided India and those for subsequent years to the Joint-Stock Banks having their registered offices in the Indian Union. The figures for 1946 cover banks which transferred their registered offices from Pakistan to the Indian Union by 31st December 1947, and exclude banks which transferred their registered offices from the Indian Union to Pakistan by the same date.

E : *Liabilities and Assets of Indian Co-operative Banks*.—Co-operative Banks covered by this table comprise provincial and Central Co-operative

Banks, and registered non-agricultural (urban) Co-operative Credit Societies, with limited liability, each having a minimum Paid-up Capital and Reserve of Rs. 1 lakh. Figures up to 1944-45 relate to Co-operative Banks in undivided India and for subsequent years to Co-operative Banks in the Indian Union.

TABLE 128 : Relates to percentage of Cash balances to total deposits of different classes of Banks as defined above.

TABLE 129 : *Cheque Clearance* :—The table shows the number and amount of cheques cleared at principal and other clearing centres. Figures include Burma (Rangoon) up to 1941 and all clearing centres in undivided India upto 1947. Subsequent figures relate to the Indian Union.

Figures for *other centres* include the clearing houses at Agra (from May 1945) ; Ahmedabad, Allahabad (from October 1943) ; Alleppey (from November 1946) ; Amritsar (from July 1928) ; Bangalore City (from 1945) ; Coimbatore (from June 1936) ; Dehra Dun (from February 1946) ; Gaya (from March 1947) ; Hyderabad Dn. (from Nov. 1949) ; Jullundhur City (from February 1945) ; Kozhikode (Calicut) (from February 1927) ; Lucknow, Mangalore (from February 1935) ; Mathurai (Madura), Muzaffarpur (from Nov. 1950) ; Nagpur, New Delhi (from August 1947) ; Patna (from May 1943) ; Poona (from August 1947) ; Rajkot (from January 1947); and Simla (from 1924). The clearing houses at Rawalpindi and Lyallpur were included from April 1941 and September 1944 respectively and ceased to function as from 20th October and 3rd September 1947, respectively.

JOINT STOCK COMPANIES.

Statistics relating to Joint Stock Companies are based on returns prepared by the Registrars of Joint Stock Companies in regard to companies governed, in the case of Part A and Part C States, by the Indian Companies Act VII of 1913 as amended by Act XXII of 1936 and in the case of the Part B States by similar laws in force relating to registration of companies.

Statistics are shown with regard to companies limited by shares only.

Statistics relating to foreign companies which carry on business in India are shown separately. They relate to companies incorporated elsewhere than in India, chiefly with sterling capital. It should, however, be borne in mind that in the case of most of the banking and insurance companies and some of the navigation and other trading companies incorporated outside India, only a portion of the capital shown is invested in India.

All figures shown relate to undivided India upto 1946-47 and thereafter to Indian Union.

CO-OPERATIVE SOCIETIES.

The table under this Section shows in an Abstract form the working of the Co-operative movement in India since 1940-41. The latest year for which data are available is 1949-50. While the figures for 1949-50 have been reproduced for All India as well as for the various States separately, All India totals alone are shown for the previous nine years. The figures upto 1945-46 relate to undivided India and thereafter to the present territory of the Indian Union. The 'Co-operative year' is not yet uniform throughout India. However, the divergence between States in this respect is not very great, as the majority of them report for an identical period *i.e.* year ending 30th June. With regard to the other States, steps are being taken to bring them also in line with the others, as early as possible.

These statistics are based on information contained in the Reserve Bank of India publication entitled "*Statistical Statement relating to the Co-operative Movement in India*" which is compiled from statements furnished by the State Registrars of Co-operative Societies.

Figures are shown separately for Central, Agricultural and Non-agricultural societies. The central societies include provincial and central banks, banking unions and supervising and guaranteeing unions. Similarly agricultural societies include cattle insurance societies, and land mortgage banks and societies. Non-agricultural societies include other insurance societies also. Figures of working capital exclude unions and insurance societies. "Reserve funds" and "other funds" have been shown as reserves. Loans issued to members and other societies include loans to banks also.

No. 138.—Number, Membership and Financial position of Co-operative Societies.

States.	Kind of Society.	No. of Societies at the close of the year.	No. of members.	Working Capital (in thousand rupees). Loans from private persons, other Societies, and Banks. (a)	Share capital.	Deposits by members. (b)

INSURANCE

INSURANCE.

The figures refer to the insurance business of insurers registered under the Insurance Act, 1938. The Postal Life Insurance Fund (tables—144 to 146) is, however, exempt from the operation of the Act.

Life Insurance. (Tables—139 to 143.)

Figures are for calendar year ending 31st December. They relate to Undivided India up to 1946 and to Indian Union thereafter.

Table 140.— Only important items of Liabilities have been shown. They exclude liabilities on account of Profit and Loss, Reserve Funds, Investment Fluctuation account and other outstanding liabilities. Assets shown are total Assets including Capital expenditure.

Postal Insurance. (Tables—144 to 146)

Figures are for financial year April to March. They relate to undivided India up to 4th August, 1947 and to Indian Union thereafter. Opening and closing Balances for the subsequent period include share pertaining to Pakistan, as the separation of policies for which Pakistan is liable, has not been completed as yet.

Fire, Marine and Miscellaneous Insurance. (Tables—147-148)

Figures are for calendar year ending December 31. They relate to undivided India up to 1946 and to Indian Union thereafter.

Table 148—

Constituted in U. K.—Includes insurers holding standing contracts with Lloyds.

Constituted in Australasia.—Includes companies constituted in Australia and New Zealand.

(1) Figures prior to 1947 relate to undivided India.

(a) Including Rs. 10,000 being the Fire insurance premium of one Insurer constituted in Africa, doing mainly life business.

(b) Figures for one insurer are not available.

Source : Department of Insurance.

AGRICULTURE

Available statistics regarding Agriculture shown in the following tables cover a period of ten years from 1939-40 to 1948-49, the latter being the latest year for which figures are available. While total figures for All-India are shown for the earlier years, their Statewise distribution is shown for the year 1948-49. Only figures for the year 1939-40 to 1942-43 are for undivided India and include the former British Indian provinces and states but subsequent figures relate to the Indian Union and include Part A, B and C States as they are known at present. Several of the figures shown in the previous issues of the 'Abstract' have now been revised in the present issue. This was done partly in order to show Indian Union figures where undivided India figures only were available before, and partly because the coverage of agricultural data has also changed with the constitutional changes in India in recent years. The source for the data published is the Ministry of Food & Agriculture who in turn depend on the individual State authorities for primary returns.

Agricultural area has been classified into different categories in table No. 149. Here *area by professional survey* is calculated by the Survey of India. Whereas *area according to village papers* is worked out from the returns of area prepared by the village staff for revenue purposes. There is a slight difference between the above two sets of figures because of the different methods by which they are calculated and also because some areas are unsurveyed and reporting agency there does not exist.

Area under forests returned in the Agricultural Statistics do not agree in most cases with those stated in the Report on the administration of Forest Departments because of the following reasons :—

(1) The administration reports relate exclusively to forests worked by Forest Departments while the tables of agricultural statistics include in addition forest areas administered by District Officers. (2) Certain village and other lands not covered by forest but worked by Forest Departments are not treated as forests in the returns of Agricultural Statistics.

Area not available for cultivation is land which is absolutely barren or un-cultivable or covered by buildings, water or roads or otherwise appropriated for non-agricultural purposes.

Other un-cultivated land excluding current fallows denote land for cultivation but not taken up and includes graves, areas under bamboos and thatching grass when not included under forests.

Current fallows denote culturable areas which after abandonment remain un-cultivated over a defined period of varying length in different states.

Area sown with crops.—In computing the aggregate net area sown, the areas sown more than once have been counted only once. However while calculating area under individual crops, the same area is sometimes counted more than once when different crops are raised on such lands. This would result in an increase of roughly 15 per cent in the aggregate area under crops over the aggregate area sown.

Tables Nos. 150 and 151 show area under irrigation and area of each crop under irrigation and their distribution Statewise. Details are also shown regarding the sources of irrigation. Table No. 152 and 153 again show the area and yield of each crop and their Statewise distribution for 1948-49 and total India figures for previous years. Annual figures have been revised in many instances. Table No. 154 shows data concerning Land Revenue Assessment in different States classified according to different systems of land tenure prevailing in them and other relevant particulars.

No. 149.—Total Area and Classification of Area in India in Acres 1948-49.

* Statistics of the incident of land revenue assessment dealt with in this table show only the average amount contributed by each acre of land or per head of population in each province or districts towards land revenue. They cannot be used for comparing the burden of land revenue on land in the different districts and provinces as no valid comparision is possible without taking into account such factors as the nature of the soil, climate, facilities for irrigation, etc.

IRRIGATION

IRRIGATION.

The tables show in an abstract form the available statistics concerning irrigation. They cover a period of ten years from 1939-40 to 1948-49, the latter being the latest year for which figures are available. Whereas total annual figures alone are shown for All-India for earlier years, their state-wise distribution is also shown for 1948-49. Data prior to 1946-47 relate to undivided India and subsequent data cover Indian Union territories only.

Table No. 155 shows data concerning principal irrigation works and results of their operations. They include canals and their distributions, area of land irrigated, total capital outlay, gross receipts, working expenses, net revenue, interest on capital outlay, etc. Works are also classified into productive and unproductive.

Productive Works are those which produce sufficient revenue to cover the working expenses and interest on capital at charge. Most of the largest irrigation works in India belong to this class.

Unproductive Works are those which consist mostly of works not considered sufficiently remunerative but sanctioned with a view to protecting precarious tracts against famine. Details are given separately for each irrigation system in each State.

Table No. 156 shows further data concerning operations of Irrigation and Navigation. The data shown in the above tables are furnished by the respective authorities in the State Governments.

Table No. 157 deals with the general results of Irrigation and Navigation, Embankment and Drainage Works. Here the data are given State-wise for each of the years 1939-40 to 1948-49. The source for the data is "The Combined Finance and Revenue Accounts of Central and State Governments in India."

FORESTS

FORESTS

Statistics concerning Forests are shown in two tables. The first table deals with the area of forest lands and outturn of forest produce in the different States of the Indian Union. Areas under forest are classified according to categories such as " Reserved ", " Protected " and " Unclassed". Reserved forests are those that are intended mainly for timber production and in which right of grazing and cultivation are seldom allowed. In Protected forests, these rights are allowed subject to a few mild restrictions. Unclassed area occurs largely in Bengal and Assam and consists mostly of inaccessible forests and in many States includes unoccupied waste. Outturn of produce is of two kinds : " timber and fuel " and " minor produce ", important among " minor produce " being bamboo and fodder grass. Figures of quantity are shown in the case of the former and value in the case of the latter.

The other table gives figures regarding area of forests protected from fire and from cattle.

These data are given for a period of ten years the latest year for which they are available being 1948-49. Only totals are shown for the earlier years, whereas Statewise distribution is also shown for the latest year which covers total Indian Union territory. Yearly totals for the period prior to 1945-46 are for pre-partition Provinces while those for subsequent years are for Indian Union Provinces only.

As a result of the recent constitutional changes the coverage of forest statistics has increased considerably during 1947-48 and 1948-49 as compared with previous years. Formerly these data were confined to the former Indian Provinces only.

Further details concerning forest statistics are available in the *Annual Returns of Forest Administration of India* and other publications of the Ministry of Food and Agriculture namely *Agricultural Statistics of India, Volumes I and II*, *Indian Forest Statistics, etc.*

MINERAL PRODUCTION.

Production of Chief Minerals in the Indian Union (Table No. 160)—

Figures relate to all Act and Non-Act Mines in the Indian Union.

Average number of persons employed, etc. (Table No. 161)—

The figures represent the daily labour employed both above ground and below ground in Act as well as Non-Act mines. The twelve minerals mentioned in this table are the only ores relating to which reliable labour statistics are available.

No. 160.—Production of Minerals in the Indian Union.

INDUSTRIAL LABOUR

Statistics in this section, upto the year 1948 have been collected under the Indian Factories Act, 1934, which covered factories employing 20 or more workers and where the manufacturing process was carried on with the aid of power. Some of the factories employing 10 or more workers were notified and were also covered. The data for 1949 are under the new Factories Act, 1948, which applies to establishments employing 10 or more workers where power is used and 20 or more workers where power is not used. The term 'workers' excludes persons employed in a clerical capacity. The new Act also removes the distinction between perennial and seasonal factories In order to make the data comparable, the two groups shown separately in previous years have been amalgamated.

Figures upto 1946 relate to the provinces of the undivided India while the later ones relate to the Part 'A' States and certain Part 'C' States (as enumerated) of the Indian Union. Figures for 1946, however, exclude Punjab and N. W. F. P. Figures for Andaman and Nicobar Islands have been included from 1947. Further details regarding individual tables are shown below :—

Table 162.—Enumeration of Factories and average daily employment in Part 'A' and 'C' States.

The term Number refers to the total number of factories under the Factories Act under each industry. Some of these factories in certain cases did not furnish relevant returns regarding employment. Such cases have been indicated in footnotes.

Table 163.—Enumeration of Factories and average daily employment in Part 'B' States.

The data relates to former princely States, now classified as Part 'B' and in some cases as Part 'C' States. The set-up of the States has since been considerably changed and most of them have either been integrated into unions or merged with adjacent provinces. As the figures beyond 1947 are not available, the old set-up has been kept for the purpose of this table.

The scope of the figures is limited to employment in factories engaging 20 or more persons and using power. Figures upto 1946 include French Settlements also. Data for 1947 are, however, not complete in respect of Rajputana. Information relating to seasonal factories in Indore has been repeated from 1944 for the subsequent years for want of the relevant data.

Tables 164 and 165.—Average annual earnings of Factory employees by States and by industries.

The data showing trends of wages in various States and different industries are compiled from annual returns under the Payment of Wages Act. These are, however, based on wage bills of factories and do not give any information regarding earnings in individual occupations. The term 'worker' under the Payment of Wages Act applies to all factory employees including clerical and supervisory staff whose monthly earnings are below Rs. 200. 'Wages' as defined under the Act include, besides basic wages and dearness allowance, all remuneration capable of being expressed in terms of money.

Table 166.—Wages in Tea plantations and Mining Industries.

Tea plantations.—Figures represent the average monthly cash earnings of settled men labourers in Assam Tea plantations for March and September each year.

Mining Industry.—Figures represent the average daily earnings in December each year of underground miners in various mining industries at important centres.

Indices with the year 1926 as base have also been shown.

Table 167.—Statistics of Accidents, Holidays, etc.

The table presents a comparative picture of factories, employment and accidents.

Under the Factories Act, 1934 (applicable to figures upto 1948) the terms, Adult, Adolescent and Child mean :

Adult.—who has completed his seventeenth year.

Adolescent.—who has completed his fifteenth but not completed his seventeenth year.

Child.—Who has not completed his fifteenth year.

The new Factories Act has made certain changes in these age limits in so far as now an adult is a person who has completed his eighteenth year, an adolescent is a person who has completed his fifteenth but not completed his eighteenth year, while definition of 'child' remains unchanged.

SPECIAL INDUSTRIES

SPECIAL INDUSTRIES

This section presents data on Textile (Cotton, Jute and Wool), Paper and Brewery industries. Figures are based on returns submitted voluntarily by the State authorities. The data about capital structure exclude the capital of private and proprietory concerns from which no information in this connection could be obtained. Number of looms and spindles excludes idle looms and spindles.

Table 168.—Data on Cotton Mills relate to all Part 'A', 'B' & 'C' States of Indian Union. Prior to 1947-48 figures relate to undivided India.

Table 169.—Information regarding Jute Mills is confined to Part 'A' States only. Data prior to 1947-48 relate to undivided India. Figures of mill consumption of raw jute are provisional.

Table 170.—Data subsequent to 1946 relate to Indian Union. Figures for Kashmir are not available since 1947.

Table 171.—Figures relate to Paper mills in Indian Union from 1947 and to undivided India for the earlier period. Data from 1947 exclude Bihar.

Table 172.—Figures from 1946 relate to Indian Union.

Note.—One brewery each in the State of Madras & West Bengal reported in operation last year, cease to function in 1949, the former due to prohibition and the latter to the licence being withdrawn.

Source: State Authorities.

INDUSTRIAL PRODUCTION

Ths portion deals with the following items :—

(*a*) Census of Manufacturing Industries (Summary).

(*b*) Cotton Mill production.

(*c*) Production in certain selected industries in India.

(*d*) Index numbers of Industrial Profits and Production, and

(*e*) Industrial Disputes.

Explanatory notes on the tables under each of the above items are given below :

Census of Manufacturing Industries (Tables 173—177).

This section presents a summary of statistics of Manufacturing Industries in India during 1948 as obtained by the Third Census of Manufactures conducted under the authority of the Industrial Statistics Act, 1942. Totals for the first two censuses, *i.e.*, 1946 and 1947 have also been given for comparison.

2. *Area and Period covered.*—The figures refer to the calendar years and do not cover any portion of Pakistan. The 1946 census was confined to the territory now covered by all the Part 'A' states and Delhi and Ajmer among Part 'C' states. Data for the years 1947 and 1948 cover the following Part 'B' and 'C' states in addition :—

(*a*) PEPSU (Patiala only), (*b*) Rajasthan (Jodhpur only), (*c*) Saurashtra (Porbandar), (*d*) Travancore-Cochin (Cochin only), (*e*) Vindhya Pradesh and (*f*) Himachal Pradesh.

The area and population of States covered have also been shown.

3. *Classification of Industries.*—Only 29 important industries have been included in the census. For purposes of international comparison, the United Nations Industrial Classification Number has also been shown against each industry.

4. *Establishments covered.*—The census is confined to Manufacturing industries proper and only factories listed under section 2(*j*) of the Factories Act, 1934 have been covered. Such factories were those which employed 20 or more workers in any manufacturing process carried on with the aid of power.

5. *Capital Structure.*—All particulars under this head are as on 31st December each year or the last closing date of accounts.

Productive Capital employed is the value according to the books of the factory on the date to which the particulars relate.

6. *Persons engaged.*—Include all administrative, clerical and technical staff working within the factory area and all those engaged in effecting delivery of the output. Persons employed in retail sales organization and

personnel of the central administrative offices outside the factory area have not been included. The persons employed have been divided into two broad groups :—

(*a*) Wage earners and (*b*) others.

Wage earners are those who perform manual work. They comprise both piece-workers and time-workers. Persons solely employed in a clerical capacity in a room or place where no manufacturing process is carried on, are not classified as workers.

The average daily employment has been worked out by dividing the aggregate number in attendance on all working days by total working days during the year. Daily attendance is the aggregate of attendance in all shifts. Days on which the factory was closed for whatever cause have not been treated as working days.

7. *Wages and salaries.*—Include cost of living or dearness allowances, overtime earnings and other additional payments. Fines, etc., have been deducted from these salaries and wages. The entire money value of indirect benefits has been included under wages.

8. *Cost of Materials and Fuels, etc., consumed.*—Figures refer to the quantity and purchase value of raw materials, fuel, electricity, coal gas, lubricating materials and water consumed in the manufacturing of products and by-products made for sale. Only materials *purchased* have been included and those made in the factory have not been accounted for. The purchase value includes transport charges and duties paid.

9. *Value added by manufacture.*—This measures the increase in the total value of commodities as calculated by subtracting the cost of materials, supplies, containers, fuel, purchased electric energy, contract work and depreciation of fixed assets from the total value of products including work done by the industry for customers.

10. Besides the Statewise and industrywise summary tables, information has also been given for manufacturing establishments :—

(*a*) ranked according to productive capital employed,

(*b*) listed according to number of wage earners employed and

(*c*) classified by value of products.

Cotton Mills—Production (Table 178).

The statistics of cotton spinning and weaving in Indian Mills given in this table are compiled from returns furnished in accordance with the requirements of the Cotton Industry (Statistics) Act XX of 1926.

For the purpose of the Act, goods are deemed to be manufactured when all manufacturing processes which they are intended to undergo have been completed and the goods are baled, boxed or packed, or issued out of the mill premises without being baled, boxed or packed.

Both variety-wise and State-wise details of cotton yarn spun and woven-goods manufactured have been shown. Data from 1947-48 onwards relate to the Indian Union.

Production of Selected Industries in India (Table 179).

The data contained in this table cover 59 industries. Returns of production are received from producing units on a voluntary basis except for Cotton Yarn and Textile production figures which are obtained under the Cotton Control Order.

Figures for organized industries like steel, salt, coal, sugar, cement, cotton textiles, paper, jute, matches, etc., cover the entire production in the country. Jute production figures from August 1949 relate to Mills in the membership of Indian Jute Mills Association which account for nearly 95 per cent. of entire output. Figures for other industries represent all organised factories in those industries and only small units have been left out. The data in this table relate to the Indian Union only.

Figures for installed capacities given in column 5 of the table are estimates based on one 8 hour shift and 300 working days in a year except for paper, cement and chemical industries (excluding paints and varnishes observing two 8 hour shifts) for which the estimates relate to three 8 hour shifts per day. Figures for certain industries are the actual installed capacity like cotton yarn in terms of spindles, cotton cloth and jute in terms of looms and electricity in terms of kilo-watts. Estimates of installed capacity in sugar industry are based on 92 working days of 24 hours and 10 *per cent.* recovery of sugar.

Calculations have also been made to show the annual production figures as percentages of 1946 production and of the installed capacity, wherever the basic figures are available and the results shown in columns 7 and 8 respectively.

Index of Industrial Profits (Table 180).

The index gives only a rough estimate of fluctuations of profits of the industries included and should not be treated as a general index of business profits.

Base—1939 = 100.

Coverage.—Comprises eight principal industries having a coverage of more than 60 per cent. from the point of view of paid-up capital of all the companies under these industries. Judged by the total paid-up capital of all the companies in the entire field of trade and industry, the share of the companies would, however, not exceed 25 per cent.

Computation.—Chain system, both for individual industries and all industries. Only net profits are included. The data are collected exclusively from *Investor's Indian Year Book* published by M/S Place, Siddons and Gough, Calcutta. The profits declared by a company in any year indicate the prosperity or otherwise of the company in the previous year. Besides the industry-wise indices given in Part B, the actual figures of the number of companies accounted for and their total net profits and profits of the same companies in the previous year are also given in Part A of the table.

Interim Index of Industrial Production (Table 181).

Base—1937=100.

Industries covered.—Manufacturing, mining and electricity comprising 15 industries.

Scope.—More than 90 *per cent.* of the total production in industries covered.

Basic Data.—Quantities produced.

Computation.—Weighted arithmetic average with fixed base.

Weight.—Total value of output during the base year. Industries and their respective weights are as follows—

Industries.	Weights.
1. Cotton Textiles	42
2. Jute Manufacturers	18
3. Steel	8
4. Chemicals	1
5. Paper	2
6. Cement	4
7. Matches	2
8. Paints	1
9. Wheat Flour	1
10. Distilleries and breweries	1
11. Sugar	10
12. Petrol	1
13. Kerosene	1
14. Coal	4
15. Electricity	4
	100

Interim Index of Industrial Production—New Series (Table 182).

Base—1946=100.

Industries covered.—Mining and Manufacturing comprising 20 industries.

Coverage.—Based on statistics of selected industries given in table 179.

Weights.—Value added by manufacture in the base year obtained from the First Census of Manufacturers, India– 1946. In the case of coal, the gross *ex*-factory value at pit-head of the coal mined has been taken as an estimate of value added. The industries and their respective weights are as follows :—

Industries.	Weights.
1. Coal	11·95
2. Sugar	3·54
3 Paints and Varnishes	0·61

Industries.	Weights.
4. Cement	0·67
5. Glass	0·55
6. Refractories (Ceramics)	0·48
7. Plywood (Commercial and Tea chests)	0·15
8. Paper and paper board	1·46
9. Matches	1·21
10. Cotton Textiles	43·49
11. Woollen manufactures	1·38
12. Jute	16·53
13. Chemicals	3·10
14. Non-ferrous metals	2·14
15. Steel	7·16
16. Bicycles	0·11
17. Sewing machines	0·02
18. Electric Lamps	0·04
19. Electric Fans	0·35
20. General and Electrical Engineering	5·06
TOTAL	100·00

Computation.—Weighted arithmetic average with fixed base.

Industrial Disputes (Table 183).

The statistics cover, as far as possible, all sectors of economic activity such as Factories, Mines, Plantations, Transport Services, Communications, Docks & Ports, Municipalities, Commercial Establishments, Banks & Insurance Companies, etc., and relate to stoppages of work involving 10 persons or more. Strikes for political or similar considerations and lockouts due to shortage of raw materials, etc. are excluded.

Figures bearing on the number of disputes relate to total number of disputes in progress during a part or whole of the period. Figures regarding the number of workers involved, include workers indirectly involved in disputes.

Figures from 1947 onwards relate to Indian Union. Those for 1947, however, exclude East Punjab but include East Bengal.

TRADE UNIONS

TRADE UNIONS

Figures relate to Trade Unions registered under the Indian Trade Unions Act, 1926, that have submitted returns registration under the Act not being compulsory. Figures prior to 1946-47 were confined to the former provinces. Data from 1946-47 relate to the areas specified in Table 184 with the exception of coorg which was included in 1941-49. Agricultural Trade Unions first came into the register in 1947-48.

No. 184.—Number, Membership, Income, Expenditure and Funds of the Registered Trade Unions in India. (1)

—		No. of Trade Unions. Registered.	No. of Trade Unions. From whom returns received.	Membership at the end of the year.	Income (including balance carried over from pervious year).	Expenditure.	Balance of Funds at the close of the year.

(a) Relates to 90 Unions.

PATENTS AND DESIGNS

The statistics relate to granting of patents and the registration of designs under the Indian Patents and Designs Act, 1911 (II of 1911). They do not include those relating to Trade marks or Copyright in Books, Pictures, or Patent and Proprietary medicines which respectively come within the scope of Trade Marks Act, 1940, the Indian Copyright Act, 1914 and the Drugs Act, 1940.

'*Application for a patent*' is a request, for a grant from the Government which confers on the grantee, for a limited term, the exclusive privilege of making, selling and using an "*invention*" and also of authorizing others to do so.

'*Patents Sealed*' means patents decided to be granted and sealed with the seal of the Patent Office on payment of the prescribed fees.

'*Extension of the term of patent*' means extension beyond the normal term of sixteen years. Such extensions are usually granted for further terms not exceeding five years and, in exceptional circumstances, ten years.

'*Lapsed patents*' means patents ceased to be in-force due to non-payment of prescribed fees for continuance.

'*Registration of design*' confers upon the registered proprietor 'Copyright' in the design for the period of registration (initially 5 years and extendable by further 10 years).

RAILWAYS

For statistical purposes, Indian Railway systems are broadly classified on the following lines—

CLASS I.—Railways with gross earnings of not less than Rs. 50 lakhs a year.

CLASS II.—Railways with gross earnings of less than Rs. 50 lakhs a year but exceeding Rs. 10 lakhs.

CLASS III.—Railways with gross annual earnings of not more than Rs. 10 lakhs.

The figures up to 1946-47 relate to undivided India and thereafter to Indian Union ; but figures for the period from 1st April 1947 to 14th August 1947 are exclusive of E. P., Assam and the narrow gauge of E. I. Railways.

Route Mileage of the Railways.—In calculating route mileage, double or treble lines are counted only once.

Gross Earnings and Working Expenses.—Represent total earnings and expenses of railways in an accounting period irrespective of whether the earnings have been realised or expenses paid. Gross earnings include all earnings from passenger traffic, goods traffic, parcels, luggage and other miscellaneous sources of revenue while working expenses include all expenses incurred for maintenance of structural works, supply of loco power, carriage and wagon stock, ferry steamers and harbours as well as the expenses of traffic departments, general and electric service departments and other miscellaneous expenses.

Train Mileage.—Includes the mileage of trains conveying passengers or goods or both as well as the mileage of empty trains. No deduction is made for departmental trains.

Number of passengers and Number of tons carried.—In Table No. 187, the figures represent the number of passengers and number of tons of goods originating on all Railways while in Table No. 188 they represent the total number of passengers and total number of tons of goods carried on individual railways. In the latter case, passengers travelling over two or more railways or two or more gauges of the same railway are treated as having performed two or more journeys. The figures relating to tonnage of goods carried are also recorded in the same manner.

Passenger Miles and Net Ton Miles.—The figures under these heads are the real indices of the volume of passenger and goods traffic handled. These are arrived at by multiplying the total number of passengers carried and the total number of goods carried by the respective number of miles over which hey are moved.

Accidents.—The figures exclude persons killed or injured in railway workshops.

Source:—Railway Board.

(¹) From 1st January 1949 new classes of passenger travel were introduced. From that date 1st class represents, Air Conditioned, 2nd class represents Class I, Inter Class represents Class II and 3rd Class represents Class III.

(²) These figures represent the number of passengers and tons of goods originating on all Railways and are not the total of figures shown in the later table relating to "Number of Passengers and Quantity of goods conveyed and the Earnings derived therefrom by the several Railway systems in India," which represent the total number of passengers and goods carried on individual railways.

(a) Includes 491 thousand passengers in Class II Special which was introduced from 1st December 1949.

(2) East Punjab and Assam Railway are included only for the period after Partition.

MOTOR VEHICLES

Number of motor vehicles taxed during the last quarter of the year.—The figures shown in the table may be taken to represent the bulk of the serviceable vehicles.

Revenue from Provincial Motor Vehicles Taxes and Fees in India.—Direct taxation of motor vehicles in India is a State subject. Taxation is based on various State 'Taxation Acts' and the basis and incidence of taxation varies accordingly. Receipts under 'Motor Vehicles Taxation Acts' generally include the fees for (*a*) issue and renewal of licenses and duplicate licenses, (*b*) test for competence to drive and (*c*) authorisation to drive a public service vehicle. Annual figures are compiled from the returns in prescribed forms received from various States in pursuance of the decision taken at a meeting of the Transport Advisory Council held in 1939.

ROADS

ROADS

Road Mileage and Expenditure on Extra-Municipal Roads maintained by Public Authorities—The figures are compiled annually from the returns in the prescribed forms received from various States according to recommendations of the Conference of British Commonwealth Statisticians held in Ottawa in 1935. These statistics relate to extra-municipal roads, that is, roads outside the area or jurisdiction of a Municipality, Town or City Corporation or like urban body. These roads are maintained by the (*a*) Public Works Department and Military Engineering Services and (*b*) Local Bodies. The roads maintained by the M. E. S. are generally in Cantonments where the M. E. S. are the executing agency for P. W. D. These returns do not include military roads but they include roads, provisionally classed as national highways which have come under the direct control of the Government of India with effect from April 1, 1947.

Central Road Fund Statistics.—The Central Road Fund came into being in 1929—30, on the recommendations of the Jayakar Committee. The fund was built up out of an additional tax of two annas (now 2½ annas) a gallon on motor spirit. A part of the fund (now one fifth) has been reserved for works of special or all-India importance, the balance being allocated to the States for approved works. The basis of allocation has been determined by the ratio of the consumption of motor spirit in each administrative unit.

Total receipts in the Central Road Fund and Road Fund Reserve since its inception.—The fund is non-lapsing, but the credits are subject to the annual vote of the Parliament. The Central Reserve was originally fixed by the Legislature in 1930 at 1/10th of the Central Road Fund. It was subsequently raised to 15 *per cent* in 1937 and 20 *per cent* in 1949.

SHIPPING

Indian shipping statistics are confined to foreign and coastal traffic only, data for inland shipping being far too meagre at present. Numbers of ships include their repeated voyages, *i.e.*, if a ship performs more than one voyage, it is treated as more than one vessel. Tonnage recorded is net tonnage *i.e.*, volume of enclosed spaces of vessels less crew space, engineroom and other space not used for cargo ; and the unit of measurement is one ton of 100 c.ft. Sailings include only sailing vesesls which are square-rigged, while country crafts are those sailing vessels which are not square-rigged.

Vessels in Foreign Trade are recorded as entering on the voyage inwards at the first port and as clearing on the voyage outwards at the last port at which cargo is laden. If on their inward voyage they enter a port in India in ballast or to discharge a part of their cargo and then proceed to other ports in India, their clearances and entries after the first port are recorded in the coasting trade. Similarly vessels on the voyage outwards load with part cargo for a foreign port and part for some other port or ports in India, they are recorded at the first port, of departure as cleared in the coasting trade and such vessels are again recorded as cleared in foreign trade at the last Indian Port.

Figures prior to 1947-48 relate to undivided India.

The statistics relate to all traffic, irrespective of whether it yielded any revenue or not, carried by the Indian Airlines on their scheduled, domestic and international services. Prior to August, 1947 airlines registered in undivided India were taken into account.

Further details are as below :—

Hours flown.—Hours flown by individual planes added together.

Miles flown.—Mileage flown by individual planes added together.

Capacity ton-miles.—The figures are obtained by multiplying the tonnage offered to the public for air transportation of passengers, freights and mail by the mileage flown.

Passengers, freight, mails and newspaper carried.—The number of passengers carried represents the total number of passengers carried by individual airlines, treating passengers travelling by planes of two or more airlines as having performed two or more journeys. The figures relating to the weight of freight, mails and newspaper carried are also recorded in the same manner.

Passenger-miles.—The figures are obtained by adding up the mileage, travelled by each passenger.

Load Ton-miles.—Represent the product based on the tonnage of freight, mails or newspaper, as the case may be, and the distance through which the load was carried in each case. The figures relating to total load ton-miles give the ton-miles in respect of all kinds of traffic, *viz.*, passenger, freight, mails and newspaper.

Figures prior to 15th August 1947 are for undivided India.

No. 206.—Indian Airline Operations(1).

Scheduled Internal and International Services.

(1) Revenue and non-revenue traffic on 'scheduled' services only.
(2) Includes excess baggage.

POSTS AND TELEGRAPHS

POSTS AND TELEGRAPHS

Statistics included in this section exhibit all essential financial and operating data regarding different branches of the Post and Telegraphs Department. They comprise statistics of the number of offices and the mileage of telegraph lines exsisting during each year, as well as the volume of traffic handled by those offices and|or sent over the wires. It is thus possible to make a study of the growth of the traffic against the background of expansion of facilities and *vice versa.*

Receipts under Postage includes both sale of stamps and postage paid in cash *e.g.* :—(i) postage prepaid in cash in Presidency post offices, (ii) credits afforded in the schedule of customs duty on account of postage, redirection fees, and insurance fees realised on delivery of inward foreign parcels, (iii) charges for resetting franking machines and (iv) cash realised for unpaid or insufficiently paid postal articles. Statistics relating to Telegraph offices whether maintained by the department independently or in conjunction with another office or by a licensed administrator have been included. Statistics included are actuals, but in the case of unregistered postal traffic (letters, postcards, parcels, packets and newspapers) it is not possible to maintain day-to-day statistics of the *actual* number of the articles. The *estimate* of unregistered traffic is based on an actual count of these articles in all post offices in India taken during one week in the busy season and one week in the slack season.

Table regarding Radio telegrams includes only the messages sent to ships from coastal offices. The word 'Raj' stands for the erstwhile princely States.

Progressive figures shown in some tables do not necessarily represent the sum of the latest year's figure and of the progressive figure for the preceding year as adjustments have to be carried out in these figures for which annual distribution is not readily available.

MERCHANDISE MARKS

The data refer to the detentions made and penalties imposed under the Indian Merchandise Marks Act, 1889 and relate to the ports of Calcutta, Madras and Bombay. Figures prior to 1946-47 include the port of Karachi and relate to the Undivided India.

Counterfeit trade mark.—Means a tempered, altered or effaced 'trade mark'. A 'trade mark' under the merchandise marks Act has the meaning assigned to a "registered trade mark" as defined in the Trade Marks Act, 1940 or a mark used to indicate a connection between the goods and a person having the right as a proprietor to use the mark.

False Trade description : A trade description which, as applied to goods, is untrue in a material respect. It includes every alteration of a trade description, whether by way of addition, effacement or otherwise. A 'trade description' means any description, statement or other indication, direct or indirect—

(*a*) as to the number, quantity, measure, gauge or wieght of any goods, or

(*b*) as to the place or time of production, or

(*c*) as to the mode of manufacturing any goods, or composition thereof, or

(*d*) as to any goods being the subject of an existing patent, privilege or copyright.

Use of any mark which, according to the custom of the trade, is commonly taken to be an indication of any of the above matters is also a trade description within the meaning of this Act.

Place of origin.—It is also obligatory under the Act that the goods should have applied to them an indication of the country or place in which they were made or produced. Non-description or false description of the place of origin constitutes an offence under the Act. This does not apply to goods imported for the purpose of re-export.

Stamping of piece-goods, cotton yarn and thread.—Under the requirements of the Act, all piece-goods should be conspicuously stamped in English numerals with the real length in standard yards and fraction thereof on each piece. Cotton yarn sold in bundles and cotton thread for sewing, darning, crochet or handicraft should also be conspicuously marked with weight and count of the yarn contained in each bundle and with the length or weight of the thread contained in each unit. Each piece of piece-goods, each bundle of yarn and each unit of thread should also be conspicuously marked with the name of the manufacturer or the wholesale purchaser in India of the goods.

Goods sold for export and those produced in establishments employing not more than 10 persons or not more than 20 persons in case of co-operative societies are exempted from the provisions of this Act.

No. 221.—Detentions under the Indian Merchandise Marks Act.(1)

WRECKS AND CASUALTIES

The statistics relating to Wrecks and Casualties are based on the returns furnished by the Port Officers under Section 247 of the Indian Merchant Shipping Act (1923). The figures represent the wrecks as well as casualties in the Indian waters to vessels of all nationalities and of all types from small boats to large vessels. All accidents, such as loss, abandonment, stranding or damage of vessels are taken into account. Indian waters denote generally any place on or near the coast of India as well as the coast of creeks and tidal rivers ; but in the case of a British ship, the term covers any place where a casualty occurs, if any competent witness thereof is found at any place in India.

In the year 1947, a large number of lives was lost in Indian waters as a result of the tragedy that took place on the 17th July 1947 when the ill-fated S.S. ' RAMDAS ' of 406 tons (net) foundered in Bombay Harbour.

FOREIGN TRADE BY SEA AND AIR

The statistics are compiled from the *Annual Statement of the Sea-borne Trade of India*. More recent figures are, however, based on the *Monthly Accounts relating to the Foreign Sea and Air-borne Trade and Navigation of India.*

The figures represent trade, both on private and government accounts, registered at Indian sea and air ports. The following points should be noted:

The figures up to July 1947 relate to undivided India, inclusive of Pakistan Provinces. The direct foreign trade of Western Pakistan was excluded from 1st August 1947 and that of Eastern Pakistan from 15th August 1947; but Indo-Pakistan trade was included from 1st March 1948.

The figures up to May 1948 exclude the foreign trade passing through ports in former Princely States. The foreign trade of Kutch was first included in June 1948 and that of Travancore, Saurashtra and Baroda in April 1949.

Figures up to 1947-48 other than those in the first and the last tables, which give the over-all position of imports, exports and balance of trade, exclude trade on government account.

The figures up to 1948-49 exclude goods imported or exported for use of the Defence Services or for Defence purposes. From 1949-50, these particulars are included but recording is still incomplete.

IMPORTS AND RE-EXPORTS

Import figures generally show the trade as declared by importers in the Bills of Entry (applications for clearance) and as checked by Custom Officials.

The figures relate to all foreign goods landed including those intended for re-exports. Goods entered for storage in bonded warehouses and afterwards exported therefrom are included under 'imports' and 're-exports'. No account is, however, taken of the goods transhipped, or goods removed under bond from a vessel in one port and conveyed to another port for reshipment abroad, or removed under the same conditions from one vessel to another in the same port. In fact, Indian ports are not transhipment centres for foreign countries to any considerable extent.

Trade of foreign countries on the border of India passing in transit through Indian ports* on through bills of lading from and to overseas countries is included under 'imports' and 're-exports' respectively.

Imports of passengers' baggage are not included unless they are dutiable.

All articles imported from foreign countries by parcel post are included; so also articles received by letter post, if they are dutiable.

EXPORTS AND RE-EXPORTS

Export figures represent the trade as declared in the manifests of vessels cleared which have been received and scrutinized with reports of notice of short shipment. The figures of exports relate to Indian merchandise alone as distinct from exports of foreign merchandise which are classed as re-exports.

All articles despatched to foreign countries by parcel post are included, but the contents of foreign letters despatched are not registered.

TREASURE

Imports and exports of gold and silver coin and bullion and issued currency notes are recorded separately under 'treasure' as distinct from imports and exports of 'merchandise'. The value of gold and silver represents the market value at the time and place of import or export, as the case may be.

---

* Total values of such trade are *also* shown separately in the *Monthly Accounts relating to the Foreign Sea and Air-borne Trade and Navigation of India* with effect from April 1949.

DECLARED VALUES OF TRADE

Index numbers of declared values are constructed to show the changes in the unit values of articles imported or exported.

For figures upto 1948-49, the original base is the year ending March 1928 but it has been converted to the year ending March 1939. Owing to far-reaching changes in the pattern of trade as well as in the coverage of the statistics, especially after Partition, a new series, calculated with reference to the year ending March 1949 as the base, has been introduced with effect from 1949-50. Re-export trade, which was entirely excluded from the old series, has been included in the export trade for the purpose of the index.

The method of calculation consists in revaluing the trade of the current period at the prices prevailing in the base period and then in comparing the recorded value of the current period with the corresponding value re-calculated on the above basis. Thus, if the price and quantity of any article in the base period be denoted by p_0 and q and the corresponding figures for the period under consideration by P_n and q_n the price index (p_n) may be defined symbolically as :

$$P_n = \frac{\Sigma\, p_n\, q_n}{\Sigma\, p_0\, q_n} \times 100$$

In actual practice the calculation has to be based on a selected number of items, *i.e.*, those for which both quantity and value figures are recorded in the trade returns. In the case of the old series, it was assumed that the average price changes of the omitted articles (*i.e.*, those directly not made use of in the calculation) were the same as those of the selected articles. But in the case of the new series, the omitted items are given separate and detailed consideration in the light of the price changes of related articles. The total numbers of imported and exported items (or articles) taken into account in the calculation of the old series were 161 and 76 respectively having a coverage of 64 *per cent* of the import trade and 88 *per cent* of the export trade during 1948-49. The items directly taken into account in the calculation of the new series number 216 for imports and 115 for exports (including re-exports), with a coverage of over 67 *per cent* of the import trade and 93 *per cent* of the total export and re-export trade during the base year 1948-49.

QUANTUM OF TRADE

Quantum indices are designed to show the movements in the aggregate value of imports and exports after elimination of the effect of price changes. The base periods for both the old and the new series are the same as in the caes of declared values. The quantum index (Q_n) can be defined as below

$$Q_n = 100 \times \frac{V_n}{V_0} \Big/ \frac{P_n}{100}$$

where V_0 denotes the aggregate value of the trade recorded for the base period V_n the corresponding figure for the given period and P_n the index number of declared values, as defined above.

QUANTITIES AND VALUES

The quantities represent *net* weight exclusive of containers, while the value of goods represents (*i*) the wholesale cash price less trade discount, for which goods of the like kind and quality are sold or are capable of being sold at the time and place of importation or exportation, as the case may be, without any abatement or deduction whatever, except (in the case of goods imported) of the amount of duties payable on the importation thereof; or (*ii*) where such price is not ascertainable the cost at which the goods of the like kind and quality could be delivered at such place without any abatement or deduction except as aforesaid. Import valuation in practice mostly correspond to c.i.f. method, but export valuation is not strictly on f.o.b. basis as it does not take into account export duties and such items as dock charges, cost of transport, etc., upto the vessel.

CLASSIFICATION BY COUNTRIES

Imports are put to the credit of countries whence they are actually consigned whether by land and then sea, or by sea only, or by air, without any interruption of transit except in the course of transhipment or transfer from one means of conveyance to another. The country of consignment, therefore, is not necessarily the country whence the goods were directly shipped to India or where the goods were produced or manufactured.

Exports and re-exports are classified with reference to countries of final destination, *i.e.*, countries to which the goods are intended to pass ultimately, whether by sea and then land, or by sea only, or by air, without interruption of transit except in the course of transhipment or transfer from one means of conveyance to another. The country of final destination is not thus necessarily the country containing the port of discharge.

Dollar Area.—The whole of North, Central and South America together with Hawaii and Philippines but excluding (*i*) all British possessions in America except Canada and Newfoundland, (*ii*) French and Dutch West Indies. (*iii*) French and Dutch Guiana, (*iv*) Brazil, (*v*) Uruguay,(*vi*) Chile, (*vii*) Peru, (*viii*) Argentine Republic and (*ix*) Paraguay.

Other Hard Currency Area.—Western Germany, Belgium, Belgian Congo, Switzerland, Japan, Argentine Republic and Paraguay.

Medium Currency Area.—Portugal and Portuguese Possessions.

Sterling area.—All Commonwealth countries (except Canada, Newfoundland, and Anglo-Egyptian Sudan) together with Burma, Iraq, Maskat Territory, Kuwait, Trucial Coast, Iceland and Irish Republic.

Pakistan.—It formed an integral part of India before 15th August 1947 and is now treated as a separate independent country within the British Commonwealth. Indo-Pakistan trade figures are recorded from March 1948.

Burma.—Treated as a foreign country outside the British Commonwealth from April 1948.

China.—Excludes Manchuria and Kwantung.

United Kingdom.—Includes Channel Islands but excludes Irish Republic.

Union of Socialist Soviet Republics.—Includes Russia (European and Asiatic), Turkistan (Russian), Armenia, Georgia and Azerbaizan.

United States of America.—Excludes Alaska.

Source : Ministry of Commerce and Industry.

(1) Excludes transit trade of foreign countries on India's border passing through Indian ports.

BALANCE OF PAYMENTS

The tables relate to the Indian Union but exclude its transactions with Pakistan. According to an estimate published in the February 1950 issue of the Reserve Bank of India Bulletin India's deficit with Pakistan on current account was in the neighbourhood of Rs. 34 crores during the period July 1948—June 1949. Subsequent estimates available for the six months, July-December 1949 and the year 1950 place the deficits at Rs. 8·5 crores and Rs. 2·0 crores respectively.

CURRENT ACCOUNT

The receipts and payments are based mainly on the records of the Exchange Control Department.

Other details are as below:

Merchandise—The figures exclude transactions under Government barter deals except in 1949. Imports are c.i.f. and exports f.o.b. Though some of the exports in the Exchange Control Department returns are c.f. and c.i.f., the figures have been adjusted so as to give f.o.b. values; the freight and insurance elements so removed have been transferred to the relevant items.

Transportations.—Receipts include charges etc., met by foreign ships in Indian ports, while payments cover operating expenses abroad, of Indian Steamship companies and some freight payments.

Investment income.—Receipts include interest on the investments of the Reserve Bank of India. Figures of payments are estimates.

Government not included elsewhere.—The payments figures represent disbursements of Government such as those for pensions and the upkeep of its offices abroad as also contributions to international organisations.

Miscellaneous (Services).—This item covers, in the main, receipts and payments for services such as those for agency services, and film rentals.

Donations.—These are mainly unilateral transfers like maintenance allowances and remittances received by missionaries.

Sterling area.—All British and British Commonwealth countries (excluding Canada, Newfoundland and Anglo-Egyptian Sudan) together with Burma, Iraq, Persian Gulf Sheikhdoms, Irish Republic, and Iceland.

Hard Currency Area.—Comprised for the first half of 1948, the United States, other American Account Countries, Canada, Belgium, Sweden, Switzerland, Portugal and its possessions (excluding those in India), Germany and Japan. From the second half of 1948, Argentine and Paraguay were included in the list while Sweden was excluded. Switzerland was excluded during the second half of 1948, first half of 1949 and again from November, 1950. Portugal and its possessions (excluding those in India) were removed from the list from the second half of 1949. Liberia came to be treated as a hard currency country from May 1950 while Paraguay was excluded. Belgium and Germany ceased to be hard currency countries from August 1950.

CAPITAL ACCOUNT

The information is collected from the records of the Reserve Bank of India.

Other details are as below :

Long-term Capital (Private).—The figures include an element of estimation. They are also likely to include some short-term items.

Portfolio securities.—Includes repatriations of sterling stock and movements in rupee securities held by foreigners on the liabilities side. The entries on the assets side relate to changes in long term sterling securities.

Other liabilities (short-term) to official and banking institutions.—Represent movement in rupee balances held by non-resident banks and official institutions and movement in exchange liabilities of authorised dealers.

Other (short-term).—Includes, among other things, changes in the sterling assets of the Reserve Bank of India, but, from this, the amount transferred to Pakistan is excluded.

COASTING TRADE

COASTING TRADE.

Coasting trade statistics represent the trade registered at the ports in States (Old Provinces), that is, the trade between one State (Old Province) on the one side and all other States (Old Provinces and former Indian States, such as Kutch, Travancore, etc.) *plus* certain other ports on the Indian coast (*e. g.*, French Ports, Goa, etc.) on the other. The trade among ports within the same State has not been included into the table presented shere.

For the purposes of trade and tariff, Pakistan was declared to be a foreign country with effect from 1st March 1948, and hence the coasting trade of India with Pakistan ports is excluded from that date.

The figures show generally the trade as declared in the shipping documents duly scrutinised and passed through the Custom Houses. The term ' Indian merchandise ' comprises all goods that are of the growth, produce or manufacture of India. Indian merchandise is distinguished from foreign merchandise in the declaration of importers or exporters made in the bills of entry or shipping bills from which the trade statistics are compiled. Passengers' baggage, postal transactions and merchandise transhipped at Custom ports are excluded from the scope of these statistics. Imports and exports of treasure which includes gold and silver (bullion and coin) only are recorded separately and are not included in the figures of merchandise. From 1948-49, the distinction between private merchandise and Government stores has been abolished and combined figures of trade under both these categories are published.

In the values of articles imported or exported as recorded in the coasting trade, customs and excise duties previously paid are included.

The year refers to the period of twelve months, April to March.

No. 241.—Total Value of Coasting Trade.

(1) Include Sind upto 1947-48.

INLAND TRADE.

1. *Nature and scope.*—Inland trade statistics represent only the movement of the trade, by railways and steamer services, into and from a State (Old province or Indian State) taken as a whole or a chief port or ports, the trade of which is registered separately from that of the State (Old province or Indian State) in which such port or ports may be situated. Movement of the trade by other means (*e.g.* road, air, country boats, etc.) is thus excluded from the scope of these statistics.

2. *Method of registration.*—The statistics are recorded on 'import' basis. According to the arrangement in force, each of the railways registers such traffic as is received at stations on its line within a particular trade block from other trade blocks, without taking into account the traffic *en route* to a destination on a different railway system or to a station on the same system but located outside that trade block. With a view to reducing the number of returns, imports into the stations on the minor railways are recorded by the major railways connecting them.

For river-borne trade, the following traffic is recorded by the agents of the different steamer services concerned ; (i) between Calcutta on one hand and Assam, West Bengal (excluding Calcutta), Bihar and Uttar Pradesh on the other, (ii) between West Bengal (excluding Calcutta) on one side and Assam, Bihar and Uttar Pradesh on the other, (iii) between Assam on one hand and Bihar and Uttar Pradesh on the other and (iv) between Bihar and Uttar Pradesh.

The traffic carried partly by rail and partly by river, when booked through and carried by steamers running in connection with railways, is to be recorded generally by the railway administration concerned.

3. *Articles and unit of measurement.*—The trade in certain staple articles only is recorded in the standard mds. of 82 2/7 lbs. The weight recorded is the net weight, *i.e.*, the gross weight entered in the invoices less certain fixed percentages which have been taken to represent the weight of packings, etc. Values are not recorded. Figures of oilseeds represent the trade in the following varieties :—(i) Castor, (ii) cotton, (iii) groundnuts, (iv) linseed, (v) rape and mustard and (vi) til or jinjili. Cotton piecegoods include both Indian and foreign cloth. Jute, raw, includes both loose and pucca bales. Raw cotton figures do not make a distinction between ginned or unginned.

4. *Period covered.*—Figures relate generally to the financial year, April to March ; but in the case of cotton, raw, figures for 1948-49 and 1949-50 relate to the cotton year, September to August.

5. *Effect of Partition.*—As a result of Partition the traffic relating to the trade blocks of (1) N.W.F.P., (2) Sind, (3) Baluchistan and (4) Karachi, which were transferred to Pakistan, were excluded from the scope of the statistics with effect from the 1st September 1947. As regards (i) West Punjab, (ii) East Bengal and (iii) a part of Assam, which also went over to Pakistan, statistics of imports into area (i) were excluded from the statistics with effect from the 15th August 1947, while those into (ii) and (iii) from as early as 1st May 1947 owing to non-receipt of returns. It was not

however, possible to exclude entirely the traffic originating in areas (i) to (iii) and terminating in Indian territories till 1st March 1948.

6. *Trade blocks.*—For a rough and approximate delimitation of areas covered by each trade block, *see* Appendix I-(*a*) to the Guide to Current Official Statistics, Vol. II. Prior to April 1947, Baluchistan formed a part of the trade block, Sind and British Baluchistan, and Goa a part of Bombay.

LAND FRONTIER TRADE.

Land frontier trade statistics are compiled from the "*Accounts relating to the Trade of India by Land with Foreign Countries*' published by the Department of Commercial Intelligence and Statistics. This section comprises two parts. The first part deals with the trade with Tibet, Nepal, Sikkim and Bhutan and gives only the volume of traffic recorded at certain railway stations adjacent to the land frontier routes in the absence of a customs barrier. Only the quantities are shown and not values, which are not recorded at present. The second part deals with India's land frontier trade with Pakistan, Afghanistan and Iran as registered at the Indo-Pakistan land customs lines.

The Partition of India in August 1947 altered India's land frontiers as well as the character of its land frontier trade. The bulk of its trade, under the present set-up, is with Pakistan.

No. 244.—Trade with Tibet, Nepal, Sikkim and Bhutan (Rail-borne trade at Stations adjacent to land-frontier routes).

Source : Controller of Salt.

* Note.—(1) Besides indigenous salt as shown above there were imports of 43·4 lakh mds. of salt (*including* 1·4 lakh maunds of rock salt from Pakistan) from foreign countries such as Aden, Port Said, Egypt, Pakistan, etc.

(2) Production of salt of 12,97 thousand maunds by small scale unlicenced manufacturers has not been included in the above statement.

(3) Stocks of 23,39,000 and 29,51,000 maunds of salt lying at Salkia Salt Golahs on 1st January 1950 and 31st December 1950 respectively have not been included in the above statement. West Bengal figures relate to salt produced in the State only.

APPENDIX B.—CURRENCY.

The issue of the quaternary (Silver) Rupee was discontinued from the end of May 1946, and the new Pure Nickel Rupee coin was introduced in June 1947. The new Rupee coin is of the same weight as the quaternary Rupee coin (*i.e.*, 180 grains troy), though slightly of a smaller diameter of 1·1 inch.

The Indian denominations are :—

Pie	=1/12 Anna.
Half-pice	=$\frac{1}{8}$ Anna.
Pice	=$\frac{1}{4}$ Anna.
Half Anna	=1/32 Rupee.
Anna	=1/16 Rupee.
2 annas	=$\frac{1}{8}$ Rupee.
4 annas	=$\frac{1}{4}$ Rupee.
8 annas	=$\frac{1}{2}$ Rupee.
Rupee.	

1 lakh=1,00,000 and 1 crore=100 lakhs.

The denominations of currency notes in circulation are 1, 2, 5, 10 and 100 rupees.

The one rupee note is treated as rupee coin.

APPENDIX C.—RATES OF INCOME-TAX AS ON 1ST APRIL, 1950.

PART I.

Rates of Income-tax.

A. In the case of every individual, Hindu undivided family, unregistered firm and other association of persons, not being a case to which paragraph B or C of this Part applies—

	Rate.
1. On the first Rs. 1,500 of total income	*Nil.*
2. On the next Rs. 3,500 of total income	Nine pies in the rupee.
3. On the next Rs. 5,000 of total income	One anna and nine pies in the rupee.
4. On the next Rs. 5,000 of total income	Three annas in the rupee.
5. On the balance of total income	Four annas in the rupee.

Provided that—

(i) no income-tax shall be payable on a total income which, before deduction of the allowance, if any, for earned income, does not exceed the limit specified below ;

(ii) the income-tax payable shall in no case exceed half the amount by which the total income (before deduction of the said allowance, if any, for earned income) exceeds the said limit ;

(iii) the income-tax payable on the total income as reduced by the allowance for earned income shall not exceed either—

(*a*) a sum bearing to half the amount by which the total income (before deduction of the allowance for earned income) exceeds the said limit the same proportion as such reduced total income bears to the unreduced total income, or

(*b*) the income-tax payable on the income so reduced at the rates herein specified,—

whichever is less.

The limit referred to in the above proviso shall be—

(i) Rs. 7,200 in the case of every Hindu undivided family which satisfies as at the end of the previous year either of the following conditions, namely :—

(*a*) that it has at least two members entitled to a share on partition who are not less than 18 years of age ; or

(*b*) that it has at least two members entitled to a share on partition neither of whom is a lineal descendant of the other and both of whom are not lineally descended from any other living member of the family ; and

(ii) Rs. 3,600 in every other case.

B. In the case of every company—

	Rate.
On the whole of total income	Four annas in the rupee.

APPENDIX C—*contd.*

Provided that in the case of a company which, in respect of its profits liable to tax under the Income-tax Act for the year ending on the 31st day of March 1951, has made the prescribed arrangements for the declaration and payment within the territory of India excluding the State of Jammu and Kashmir, of the dividends payable out of such profits, and has deducted super-tax from the dividends in accordance with the provisions of sub-section (*3D*) or (*3E*) of section 18 of that Act—

(i) where the total income, as reduced by six and a half annas in the rupee and by the amount, if any, exempt from income-tax, exceeds the amount of any dividends (including dividends payable at a fixed rate) declared in respect of the whole or part of the previous year for the assessment for the year ending on the 31st day of March 1951, and no order has been made under sub-section (1) of Section 23A of the Income-tax Act, a rebate shall be allowed at the rate of one anna per rupee on the amount of such excess;

(ii) where the amount of dividends referred to in clause (i) above exceeds the total income as reduced by six and a half annas in the rupee and by the amount, if any, exempt from income-tax, there shall be charged on the total income an additional income-tax equal to the sum, if any, by which the aggregate amount of income-tax actually borne by such excess (hereinafter referred to as "the excess dividend") falls short of the amount calculated at the rate of five annas per rupee on the excess dividend.

For the purposes of the above proviso, the expression "dividend" shall have the meaning assigned to it in clause (*6A*) of Section 2 of the Income-tax Act, but any distribution included in that expression, made during the year ending on the 31st day of March 1951, shall be deemed to be a dividend declared in respect of the whole or part of the previous year.

For the purposes of clause (ii) of the above proviso, the aggregate amount of income-tax actually borne by the excess dividend shall be determined as follows:—

(i) the excess dividend shall be deemed to be out of the whole or such portion of the undistributed profits of one or more years immediately preceding the previous year as would be just sufficient to cover the amount of the excess dividend and as have not likewise been taken into account to cover an excess dividend of a preceding year;

(ii) such portion of the excess dividend as is deemed to be out of the undistributed profits of each of the said years shall be deemed to have borne tax,—

(*a*) if an order has been made under sub-section (1) of section 23A of the Income-tax Act, in respect of the undistributed profits of that year, at the rate of five annas in the rupee, and

(*b*) in respect of any other year, at the rate applicable to the total income of the company, for that year reduced by the rate at which rebate, if any, was allowed on the undistributed profits.

C. In the case of every local authority and in every case in which, under the provisions of the Income-tax Act, income-tax is to be charged at the maximum rate—

	Rate.
On the whole of total income	Four annas in the rupee.

APPENDIX C—*contd.*

PART II.

Rates of Super-tax.

A. In the case of every individual, Hindu undivided family, unregistered firm and other association of persons, not being a case to which any other paragraph of this part applies—

	Rate.
1. On the first Rs. 25,000 of total income	*Nil.*
2. On the next Rs. 15,000 of total income	Three annas in the rupee.
3. On the next Rs. 15,000 of total income	Four annas in the rupee.
4. On the next Rs. 15,000 of total income	Six annas in the rupee.
5. On the next Rs. 15,000 of total income	Seven annas in the rupee.
6. On the next Rs. 15,000 of total income	Seven and a half annas in the rupee.
7. On the next Rs. 50,000 of total income	Eight annas in the rupee.
8. On the balance of total income	Eight and a half annas in the rupee.

B. In the case of every local authority :—

	Rate.
On the whole of total income	Two and a half annas in the rupee.

C. In the case of an association of persons being a co-operative society (other than the Sanikatta Saltowners' Society in the State of Bombay) for the time being registered under the Co-operative Societies Act, 1912 or under any law of a State governing the registration of co-operative societies—

	Rate.
1. On the first Rs. 25,000 of total income	*Nil.*
2. On the balance of total income	Two and a half annas in the rupee.

D. In the case of every company :—

	Rate.
On the whole of total income	Four and a half annas in the rupee.

Provided that—

(i) a rebate at the rate of three annas per rupee of the total income shall be allowed in the case of any company which—

(*a*) in respect of its profits liable to tax under the Income-tax Act for the year ending on the 31st day of March 1951, has made the prescribed arrangements for the declaration and payment in the territory of India excluding the State of Jammu and Kashmir of the dividend payable out of such profits and for the deduction of super-tax from dividends in accordance with the provisions of sub-section (*3D*) or (*3E*) of section 18 of that Act, and

(*b*) is a public company with total income not exceeding Rs. 25,000 ;

(ii) a rebate at the rate of two annas per rupee of the total income shall be allowed in the case of any company which satisfies condition (*a*), but not condition (*b*), of the preceding clause ; and

APPENDIX C—*contd.*

(iii) a rebate at the rate of one anna per rupee of the total income shall be allowed in the case of any company which, not being entitled to a rebate under either of the preceding clauses, is—

(*a*) a public company whose shares were offered for sale in a recognised stock exchange at any time during the previous year, or

(*b*) a company all of whose shares were held at the end of the previous year by one or more such public companies as aforesaid :

Provided further that the super-tax payable by a company the total income of which exceeds Rs. 25,000 shall not exceed the aggregate of—

(*a*) the super-tax which would have been payable by the company if its total income had been Rs. 25,000 and

(*b*) half the amount by which its total income exceeds Rs. 25,000.

Explanation.—For the purposes of this paragraph of this Part, a company shall be deemed to be a public company only if it is neither a private company within the meaning of the Indian Companies Act, 1913, nor a company in which shares carrying more than fifty per cent of the total voting power were, at any time during the previous year, held or controlled by less than six persons.

APPENDIX C—*concld.*

Rates of Income-tax and Super-tax.

N.B.—For Hindu undivided families, the amount of tax and percentages are also as shown above, except that such families are not liable to pay any tax, for 1949-50, if the income is not more than Rs. 5,000 and for 1950-51, if the income is not more than Rs. 7,200.

APPENDIX D.—NATIONAL INCOME.

Statistics for 1945-46 and 1946-47.

The concept of national income used is that of net domestic product at factor cost. Income from abroad has not been taken into account. The method adopted is to evaluate net output in the sector of primary production and net income in the sector of non-primary production.

The territories covered by the estimates are :

(i) British India, consisting of the Indian Provinces as they were before Partition, and

(ii) Indian Provinces, as they stood after Partition.

Statistics for 1948-49.

The inventory method is applied to as many sectors of the economy as possible, while for the remaining sectors the income method is applied. The total gives the net domestic product at factor cost, and by adjusting for income earned from abroad, the figure of national income for 1948-49 is derived.

This estimate pertains to the whole of the Indian Union (including the former Princely States integrated into the Indian Union).

APPENDIX D.—NATIONAL INCOME—*contd.*

(In crores of Rupees.)

	British India	Indian Union Provinces	
	1945-46	1945-46	1946-47

Source: Ministry of Finance.

APPENDIX E.—ELECTORAL STATISTICS.

Under the terms of the Indian Constitution there shall be a Parliament for the Union consisting of the President and two Houses to be known respectively as the Council of States and the House of the People. Similarly in each State, barring a few, there shall be elected legislature consisting of either one House known as the Legislative Assembly or two Houses known as the Legislative Council and the Legislative Assembly.

In the following tables an attempt has been made to bring out broadly the salient characteristics of the electorate in the country. For this the number of voters, constituencies and seats allotted for each State for the purpose of representation in the Parliament as also in the State Legislatures have been given.

APPEDIX E : (i)—*Number of Voters and Constituencies in each State.*

In this table are shown the number of voters and constituencies in each State for the purpose of elections to the Legislative Assembly and the House of the People. The election to the House of the People and to the Legislative Assembly of every State shall be on the basis of adult suffrage : that is to say, every person who is a citizen of India and has attained the age of 21 years, if not otherwise disqualified, shall be entitled to be a voter at any such elections. For the purposes of election to the House of the People, the States have been grouped or formed into territorial constituencies and the number to be allotted for each such constituency has been determined so as to ensure that there shall be not less than one member from every 750,000 of the population and not more than one member from every 500,000 of the population.

The Legislative Assembly of each State is to be composed of members chosen by direct election on a scale of not more than one member for every 75,000 of the population. The total number of members in the Legislative Assembly of Part A & B States shall not in any case be more than 500 or less than 60. The strength of the Legislative Assembly or Electoral College in a Part C State will be determined under the provisions of the Government of Part C States Act, 1951.

APPENDIX E : (ii)—*Representation in Legislative Assemblies and the two Houses of Parliament.*

In this table the seats allotted in the Legislative Assembly as also in the two Houses of Parliament for each State are given. While all the seats in the Legislative Assembly and the House of the People are to be filled by direct election, in case of the Council of States 12 seats are to be filled through nomination by the President and the rest through election by members of State Legislative Assemblies or Electoral Colleges, according to the quota allotted to each. The method of election in the State Assembly for choosing members for the Council of States will be on the basis of proportional representation by means of the single transferable vote.

APPENDIX E : (iii)—*Representation in Legislative Councils together with Constituencies for the purpose.*

Representation in the Legislative Council of each State, where there is such a Council, will be confined to certain special interests like Local Bodies, University Graduates and Teachers, nominees of the Governor and elected representatives of the Legislative Assembly. This table shows the proposed strength of this Council in each State together with the number of constituencies for the purpose of elections.
